Practical: 22 **Internal Assessment: 03**

1. Installation and use of various meteorological instruments for measurement of different weather parameters.
2. Study the principle and working of various meteorological instruments.
3. Study of wind direction and climatic water balance.
4. Measurement & significance of atmospheric humidity, rain fall and evaporation over an area. Interpretation of climatic data in relation to crop weather relationship.
5. Study of climatic requirement of important different crops & their distribution and yield in India.
6. Study the important crops yield sensitivity to weather fluctuation.
7. Recording, processing and presentation of climatic data on Climatographs, Charts and Maps. Study of different factors in soil formation.
8. Meteorological satellite technology in weather forecasting.
9. Climatic maps of India and Punjab.

Course Title: Animal Husbandry **Course Code: AGR-DSC-11 Maj-503**
Semester: Fifth

Objective: To get knowledge raising various breeds of milking cattle and their feeding.

Max. Marks: 100 **Course Credits =** 3+1=4

1. Theory: 75	Written Exam: 67	Internal Assessment: 8
2. Practical: 25	Written Exam: 22	Internal Assessment: 3

Periods per week: 1. Theory- Four of 45 minutes duration (Three hours)
2. Practical- One of two hours duration

Instructions for Paper Setters:

Question Paper will have four units. Students will attempt **five** questions out of total nine comprising of one **COMPULSORY** question consisting of 10 short answer type questions of one and a half mark each covering the whole syllabus. Units 'I', 'II', 'III' and 'IV' will have two questions of 13 marks each and one question is to be attempted out of each unit.

Instruction Aids: Teachers can use lecture, lecture-cum-demonstration, project, assignments, problem solving, inductive and deductive methods and can use L.C.D., L.E.D., and multimedia projector in addition to black/white board.

UNIT – I **12 Hours**

1. Role of livestock in national economy.
2. Animal husbandry and different categories of animals,
3. Milk and meat yielding animals (milk yielding animals and categories of important breeds), dairy products.
4. Draught animals and egg yielding animals

UNIT – II **11 Hours**

1. System of livestock Production (Extensive, Semi Intensive, Intensive)
2. Mixed Farming System and common terms used in animal husbandry
3. Characteristics & features of important Indian Milch breeds (Gir, Red Sindhi, Sahiwal, ~~Deoni)~~
4. Characteristics & features of important Indian Draught breeds (Nagori, Bargur Bachur, Malvi, Hallikar & Khillari & Siri)

UNIT – III **11 Hours**

1. Characteristics & features of important Exotic breeds (Shorthorn, Ayrshires, Jersy, Brown Swiss, Res Dane and Holstein-Friesian
2. Characteristics & features of important Indian Buffalo breeds (Murrah, Bhadawari, Jaffarabadi, Surti, Nagpuri, Nili-Ravi)
3. Housing of Dairy Cattle and Buffaloes (Selection of site for farm buildings, Housing layout & Housing)
4. Management of calves, Heifer, pregnant, lactating and dry animals.

UNIT – IV **11 Hours**

1. Nutrition, Ration & its desirable characteristics.
2. General classification of feeds stuff,
3. Importance of green fodder production.
4. Milking Methods (Natural techniques, Manual Techniques and Mechanical Techniques)
5. Hygienic/clean Milk Production

GUIDELINES FOR PRACTICAL EXAMINATION

Time- 3 Hrs **Max Marks: 25**
Practical: 22 **Internal Assessment: 03**

1. External body part of cow and buffaloes.
2. Handling and restraining of cow and buffaloes for milking.
3. Identification of cow and buffaloes.
4. Planning and layout of housing for cow & buffalo
5. Visit to local dairy farming.

UNIT – I 12 Hours

1. Fruits, their importance and scope (Horticulture and branches of horticulture, nutritive value of fruits, Area & production of fruits in India, Scope and problem of fruit cultivation),
2. Selection of site and soils for planting an orchard.
3. Preparation of Land and Layout of Orchard (Land Preparation, Method of planting fruit plants, high density planting)
4. Propagation Methods. (Sexual and sexual propagation methods, Micro propagations)

UNIT – II 11 Hours

1. Nursery Production (Care of young nursery plants, weeding/hoeing and plant protection measures).
2. Orchard cultural practices (Soil management practices, Fruit plant management practices)
3. Flowering of fruit plants (Blooming periods, Mode of pollinations, agencies of pollination, pollen viability)

UNIT – III 11 Hours

Cultivation practices of Tropical Fruits viz: Mango, papaya, Guava, Sapota (Origin, history and distribution, uses, climate requirement, site selection, varieties, planning/planting, orchard cultural practices, training/ pruning and important plant protection measures

UNIT – IV **11 Hours**

Cultivation practices of Sub-Tropical Fruits viz: Citrus, Grapes, Litchi, Pomegranete (Origin, history and distribution, uses, climate requirement, site selection, varieties, planning/planting, orchard cultural practices, training/ pruning and important plant protection measures

GUIDELINES FOR PRACTICAL EXAMINATION

Time- 3 Hrs **Max Marks: 25**
Practical: 22 **Internal Assessment: 03**

Practice in propagation, methods, layout of orchard, transplanting, manuring, training and pruning of fruit plants.

UNIT – I 12 Hours

1. Symptom, causal organism, disease Cycle, management & control of diseases of Wheat (Black or stem rust, Brown or leaf rust, Yellow or stripe rust, Loose smut, Flag smut, Karnal bunt, Foot rot, Powdery mildew, Leaf blight).
2. Symptom, causal organism, disease Cycle, management & control of diseases of Turmeric (Leaf Spot, Leaf Blotch. Rhizome Rot)
3. Symptom, causal organism, disease Cycle, management & control of diseases of Sunflower (Root rot or charcoal rot, Leaf blight, Rust, Head rot)

UNIT – II 11 Hours

1. Symptom, causal organism, disease Cycle, management & control of diseases of Cotton (Wilt, Verticillium wilt, Anthracnose, Bacterial blight, Leaf Curl Disease).
2. Symptom, causal organism, disease Cycle, management & control of diseases of Rice (Blast, Brown Spot, Narrow brown leaf spot, Sheath rot, Sheath blight, False smut, Stackburn disease, Bacterial leaf blight, Bacterial leaf streak, Rice Tungro Disease, Rice Grassy stunt disease, Rice yellow dwarf disease).
3. Symptom, causal organism, disease Cycle, management & control of diseases of gram (Ascochyta blight, Rust, Wilt. Powdery mildew, Anthracnose).

UNIT – III **11 Hours**

1. Symptom, causal organism, disease Cycle, management & control of diseases of Sugarcane (Red rot, Smut, Sett rot or Pineapple disease, Wilt, Rust, Gummosis, Red stripe, Sugarcane Mosaic, Grassy shoot, Ratoon stunting).
2. Symptom, causal organism, disease Cycle, management & control of diseases of Pearlmillet (Downy mildew, Smut, Rust, Ergot or Sugary disease).
3. Symptom, causal organism, disease Cycle, management & control of diseases of Maize (Downy mildew, Leaf blight, Rust, Charcoal rot, Bacterial Stalk rot).

UNIT – IV **11 Hours**

1. Symptom, causal organism, disease Cycle, management & control of diseases of Groundnut(Tikka leaf spots, Rust, Collar rot or seedling blight or crown rot, Root rot, Groundnut bud necrosis disease).
2. Symptom, causal organism, disease Cycle, management & control of different diseases of winter vegetables (cabbage, potato, onion and peas)
3. Symptom, causal organism, disease Cycle, management & control of different diseases of summer vegetables (brinjal, Chilli, cucurbits)

GUIDELINES FOR PRACTICAL EXAMINATION

Time- 3 Hrs **Max Marks: 25**
Practical: 22 **Internal Assessment: 03**

Detailed study of symptoms and host parasite relationship of representative diseases of the above mentioned crops. Collection and dry preservation of diseased specimens of important crops.

UNIT – I **12 Hours**

1. Indian status of dairy industry. Principles of production, processing and marketing of milk types.
2. Importance of livestock in agriculture and relationship between plant and animal husbandry.
3. Important Indian Milch breeds (Gir, Red Sindhi, Sahiwal, Deoni) and their characteristics & features.
4. Important Indian Draught breeds (Nagori, Bargur Bachur, Malvi, Hallikar & Khillari & Siri) and their characteristics & features.

UNIT – II **11 Hours**

1. Breeding - cross breeding- upgrading
2. Milking systems– methods and principles of clean milk productions. Control of external and internal parasites.
3. Nutrients and their functions in animal body. Feed stuff and their classification, Indian feeding standard and daily nutrient requirement of cattle.
4. Principles of rationing.

UNIT – III **11 Hours**

1. Economic importance of Poultry.
2. Advantages of poultry farming, classifications of chicken, breeds of chicken
3. Formation of egg & factor affecting egg size, Factors affecting fertility & Hatchability
4. Selection of hatching eggs. Conditions for incubation and brooding of chicks. Poultry Structures: Factors to be considered before planning a poultry house

UNIT – IV **11 Hours**

1. Type of poultry structures. Poultry equipment: brooders, feeders, waterers, nests, crates.
2. Feeding: water, proteins, carbohydrates, fats, minerals, vitamins & others.
3. Common poultry feeds: Carbohydrates feed, protein feeds, mineral & vitamin supplements.
4. Nutritional diseases of birds: Vitamin A deficiency, curled-toe paralysis, rickets, crazy chick disease, perosis. External parasites of poultry.
5. Important point to be considered for maximum egg production & Protection against hot weather

GUIDELINES FOR PRACTICAL EXAMINATION

Time- 3 Hrs **Max Marks: 25**
Practical: 22 **Internal Assessment: 03**

1. Lay out of dairy farms.
2. Handling animals and birds, transpensing, record keeping, economics of dairy and poultry, house design and litter management for dairy and poultry.
3. Grading of milk and eggs.
4. Identification of various dairy and poultry feeds.
5. Visit to dairy farms, poultry farms and veterinary hospitals.
6. Visit to feed plants for dairy and poultry.

The student exiting the programme after three years securing 144 credits will be awarded BA degree

Notes:

10. In the first semester student is offered three different subjects A, B & C.
11. At the end of second semester each student has the option to choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at the end of the second semester.
12. The student who chooses multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in Minor subject.
13. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.Sc. HONOURS with research, on the condition that the Institution is a PU approved Research Centre
14. The student opting for Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain atleast 12 credits in that subject(s).
15. The student exiting the programme after one year securing 48 credits will be awarded UG Certificate provided he/she secures 4 credits from summer internship/community work. Further, the student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secure 4 credits from summer internship. The student successfully securing 144 credits will be awarded BA degree.
16. Language paper chosen as MIL-1 and MIL-2 should be in the same subject.
17. Once Major and Minor papers are chosen in 3rd semester, the same will continue as Major and Minor subject in the subsequent semesters.
18. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write Dissertation of 08 credits in one of the two Major subjects.

2	2	4	TheoryExternalMarks:45
			TheoryInternalMarks:5
Level: L-300			NumberofTheoryHours:30
			Practical External Marks: 50
			Practical Hours: 60

Time Duration: 3 Hrs.

Objective: The objective of the module is to enable students to understand the basic concepts of the Python programming language, including lists, tuples, classes, and dictionaries. The module will enable students to do programming using the Python library.

Learning Outcome: After the completion of the module, students will gain knowledge of:

- Students would be able to develop logic for problem-solving.
- The fundamental concepts of Python programming, syntax and semantics.
- Students will learn the basic constructs of Python programming, such as data, operations, conditions, loops, functions, etc.
- Using Lists, tuples, Dictionaries, and functions in Python.
- Creating and using Files in Python.
- Using Python modules and functions.

Note:

The Question Paper will consist of Four Units.

- The examiner will set a total of nine questions, including two questions from each unit and one compulsory short answer question covering the entire syllabus.
- Students are required to attempt one question from each unit and the compulsory question.
- All questions carry equal marks unless specified.

UNIT - I

Introduction to Python Programming: IDLE interpreter, Interactive Mode Programming, Script Mode Programming, The Role of Indentation in Python, Variables, Assigning Values to Variables, Input/Output with Print and Input Functions, Basic Data Types in Python.

Operators in Python: Arithmetic, Relational, Logical, Compound Assignment, Increment and Decrement, Ternary, Bitwise, and Comma Operators, Precedence and Order of Evaluation, Statements and Expressions, Automatic and Explicit Type Conversions.

The Conditional Statements in Python: If, If-else, If-elif-else, Python loops, for-loop, while-loop, for-else, while-else, Nested Loops, the built-in Function range(), continue and break statement.

UNIT – II

Strings: Introduction to String, String Operations, Transversal of string, Methods and Inbuilt Functions.

Lists: Definition, Operations, Traversal, Methods and Inbuilt Functions, Nested Lists, Copying Lists, List as an argument, Mutable and Immutable Data types.

Tuples: Introduction, Operations, Traversal, Methods and Inbuilt Functions, Nested Tuples **Dictionaries:** Introduction, Traversal, Methods and Inbuilt Functions, Manipulating Dictionaries.

UNIT - III

Function: definition, advantages, User-defined Functions, defining a function, Function Parameters, Formal Parameters, Actual Parameters, Global and Local Variables, return values, Introduction to Anonymous Functions, passing a list, Python standard Libraries.
Classes: creating and using a class, working with classes and instances, importing classes, Python standard library.

UNIT IV

Exception Handling: exceptions and errors, try-except block, the else block, handling the Zero Division Error and File Not Found Error exception.
File Handling: Introduction, Types of Files, Opening and Closing a File, writing to a file, reading from a file, Setting offset in a file, Creating and Traversing a file.

(Practical based on paper CSA-DSC-5(Maj)-502)

Time Duration: 3 Hrs.

List of Practicals:

1. Program to print a message.
2. Program to take name, age, and marks as input and display them.
3. Program to check the data type of variables using type().
4. Program to perform all arithmetic operations on two numbers.
5. Program to show relational operator results between two numbers.
6. Program to test logical operators (and, or, not).
7. Program to demonstrate compound assignment operators (+=, -=, etc.).
8. Program using the ternary operator to find the largest of two numbers.
9. Program to check whether a number is even or odd using if-else.
10. Program to find the greatest of three numbers using if-elif-else.
11. Program to print numbers from 1 to 10 using a for-loop.
12. Program to print numbers from 1 to 10 using a while loop.
13. Program to print even numbers using for and range().
14. Program to calculate the sum of the first N natural numbers using a loop.
15. Program using nested loops to print a pattern (e.g., a rectangle of stars).
16. Program to demonstrate the break statement inside a loop.
17. Program to demonstrate the continue statement inside a loop.
18. Program using for-else (e.g., searching for an item in a list).
19. Program using while-else (e.g., counter loop finishing normally).
20. Program to input a string and print its length.
21. Program to count vowels in a string.
22. Program to check if a substring exists in a string.
23. Program to reverse a string using slicing.
24. Program to demonstrate string methods (upper(), lower(), replace(), etc.).
25. Program to create a list and display all its elements.
26. Program to find the largest and smallest element in a list.
27. Program to count even and odd numbers in a list.
28. Program to demonstrate list methods (append, remove, sort, etc.).
29. Program to take a list input from the user and print it using traversal.
30. Program to demonstrate nested lists and print elements.
31. Program to create a tuple and access its elements.
32. Program to count occurrences of an element using count().
33. Program to find index of an element using index().
34. Program to create a dictionary of student details and print keys & values.
35. Program to add, update, or delete items from a dictionary.
36. Program to iterate through dictionary using for key in dict.
37. Program to check if a key exists in a dictionary.
38. Program to define a simple function and call it.
39. Program to add two numbers using a user-defined function.
40. Program to calculate the factorial of a number using a function.
41. Program to check if a number is prime using a function.
42. Program to demonstrate default arguments in a function.
43. Program to demonstrate return statement.
44. Program using a lambda function to find the square and cube.
45. Program to pass a list to a function and print its sum.
46. Program to create a simple class with attributes and methods.
47. Program to define a class Student and display details of objects.
48. Program to demonstrate constructor (__init__).
49. Program to create multiple objects of a class.

50. Program to import a class from another file and use it.
51. Program to demonstrate try and except.
52. Program to handle ZeroDivisionError.
53. Program to handle FileNotFoundError.
54. Program using try-except-else block.
55. Program to accept integer input and handle invalid inputs.
56. Program to create and write to a text file.
57. Program to read a text file and display its contents.
58. Program to append new lines to an existing file.
59. Program to count the number of lines in a file.
60. Program to use seek() to move the file pointer to a specific position.
61. Program to copy content from one file to another.
62. Program to write list elements to a file and read them back.
63. Program to read a file and count words/characters.

Paper Title: E-Commerce
Paper Code: CSA-DSC-5(Maj)-502

Th	Pr	Cr	Theory External Marks :	90
4	-	4	Theory Internal Marks :	10
Level: L-300			Number of Theory Hours :	60

Objective: The objective of this E-commerce course is to provide students with a comprehensive understanding of online business concepts, technologies, and strategies. It aims to develop knowledge of digital marketplaces, electronic payment systems, online marketing, and secure transaction methods. Students will learn how to design, manage, and promote e-commerce websites, understand consumer behavior in the digital environment, and explore legal, ethical, and security issues.

Learning Outcomes:
By the end of the course
- Understand key concepts, models, and frameworks of e-commerce and digital business.
- Explain online payment systems, security measures, and legal/ethical issues in electronic transactions.
- Analyze consumer behavior and apply digital marketing strategies for online business growth.
- Design, manage, and evaluate e-commerce websites and online storefronts.
- Use digital tools and platforms to create, operate, and promote e-business solutions.

Note:
- The Question Paper will consist of Four Units.
- The examiner will set a total of nine questions, including two questions from each unit and one compulsory short answer question covering the entire syllabus.
- Students are required to attempt one question from each unit and the compulsory question.
- All questions carry equal marks unless specified.

UNIT I
Introduction to E-Commerce: Definition of E-commerce, Definition of E-business, Difference between E-commerce and E-business, Features of E-commerce, Scope of E-commerce, Advantages of E-commerce, Limitations of E-commerce, Traditional commerce vs. E-commerce, Types of E-commerce: B2B – Business to Business, B2C – Business to Consumer, C2C – Consumer to Consumer, C2B – Consumer to Business, B2G – Business to Government, G2C – Government to Citizen.
Definition of EDI, Need for EDI, Traditional system vs. EDI-enabled system, Components of EDI: EDI standards.

UNIT II
Web based E-Commerce: Definition; Need for web based business, steps in setting up business on Internet: Selection and registration of domain name, Website development: Planning a website, steps for creating a website, Elements of a webpage, definition of website hosting, Server, domain, and DNS concepts, Hosting control panels (cPanel, Plesk, DirectAdmin), types of web hosting

UNIT III
E-Payment Systems & Security: Electronic payment methods, Credit/Debit cards, Net banking, UPI, Mobile wallets, COD, RTGS, NEFT, IMPS, Digital currency, Blockchain basics, E-commerce security issues, Encryption, Digital signatures, Digital certificates, SSL/TLS, Cybercrime, IT Act 2000, Intellectual property issues.

UNIT IV

E-Marketing & Customer Relationship Management: Digital marketing concepts, Web Traffic Analysis: Hits, View pages, Visits and Other web-reporting tools, Search Engine Optimisation (SEO), Social Media Optimisation(SMO) , Email marketing, Pay Per Click (PPC), Customer Relationship Management tools.

Time Duration: 3 Hrs.
Course Objective: This course aims to provide students with knowledge of all the programming concepts of the Java programming language.

Learning Outcomes: On successful completion of the course, students will be able to:

- Describe the meaning of the Object-Oriented Paradigm, and create class hierarchies using the Object-Oriented Design process.
- Design and implement Java programs for complex problems

NOTE:

- The Question Paper will consist of Four Units.
- Examiner will set a total of NINE questions comprising TWO questions from each Unit and ONE compulsory question of short answer type covering the whole syllabus.
- The students are required to attempt ONE question from each Unit and the Compulsory question.
- All questions carry equal marks unless specified.
-

UNIT - I

Basic Principles of Object Oriented Programming: Introduction and Features of Java, Creating the Java program, Compiling and Running the programs, Java Virtual Machine, Java Bytecode
Basic Language Elements: Tokens, Identifiers, Keywords, Literals, Comments, Primitive Data types, Operators, Assignments; Input/output in Java: Basics, I/O Classes, Reading Console Input, Decision and Loop Control Statements, break, continue

UNIT - II

Class and Object in Java: Defining a Class, Creating Objects, Accessing Class Members, Constructors, Methods Overloading, Static Members, Abstract Class and methods; Final classes, variables and Methods; Finalizer Methods
Array & String in Java: Defining an Array, Initializing & Accessing Array, Multi–Dimensional Arrays, Defining Strings, Operation on Array and String, Managing Strings using String and StringBuffer Classes

UNIT – III

Inheritance: Benefits of Inheritance, Types of Inheritance in Java, Extending a Class, Defining a subclass, Subclass constructor, Multilevel inheritance, Hierarchical inheritance, Overriding Methods, Visibility Control
Packages & Interfaces: Basic Concepts of Package and Interface, Organizing Classes and Interfaces in Packages, Defining and naming a Package, Importing Packages, CLASSPATH Setting for Packages, Access Protection in Packages, Standard Packages

UNIT IV

Exception Handling in Java: Basics of Exception, Types of Exception, Use of try, catch, finally, throw, throws in Exception Handling, Catching more than one Exception, In-built and User Defined Exceptions, Checked and Un-Checked Exceptions,

Applet in Java: Applet Basics, Applet Architecture, Applet Life Cycle, Applet Tag, Parameters to Applet, Embedding Applets in a Web page, Creating Simple Applets

Multithreaded Programming: Creating a single and multiple threads using different ways, thread priorities, synchronization.

Suggested Readings:

1. Programming with JAVA - E Balgurusamy
2. The Complete Reference – JAVA Herbert Schildt.
3. "JAVA 2 UNLEASHED, Tech Media Publications, New Delhi.

List of Practicals:

1. Program to print a simple message.
2. Program to show the use of tokens (identifiers, keywords, literals).
3. Program to demonstrate primitive data types (int, float, double, char, boolean).
4. Program to demonstrate arithmetic operators (+, −, *, /, %).
5. Program to demonstrate relational and logical operators.
6. Program to demonstrate assignment operators.
7. Program to read input using Scanner.
8. Program to demonstrate break and continue in loops.
9. Program to check even/odd using if-else.
10. Program to print numbers from 1 to 10 using a loop.
11. Program to create a simple class and object.
12. Program to access class members (variables & methods).
13. Program to demonstrate constructors.
14. Program to demonstrate constructor overloading.
15. Program to demonstrate method overloading.
16. Program to demonstrate static variables and static methods.
17. Program to demonstrate final variable, final method, final class.
18. Program to demonstrate abstract class and abstract method.
19. Program to demonstrate the finalize() method.
20. Program to create and print a 1D array.
21. Program to find the sum of array elements.
22. Program to find the largest element in an array.
23. Program to create and print a 2D array.
24. Program to demonstrate simple String operations (length, concat, compare).
25. Program to reverse a string.
26. Program to show StringBuffer operations (append, insert, delete).
27. Program to demonstrate single inheritance.
28. Program to demonstrate multilevel inheritance.
29. Program to demonstrate hierarchical inheritance.
30. Program to demonstrate method overriding.
31. Program to demonstrate super keyword.
32. Program to demonstrate visibility (public, private, protected).
33. Program to create a user-defined package.
34. Program to import a package and use its class.
35. Program to demonstrate multiple inheritance using interfaces.
36. Program to demonstrate try-catch.
37. Program to demonstrate multiple catch blocks.

38. Program to demonstrate finally block.
39. Program to throw an exception using throw.
40. Program to create a user-defined exception.
41. Program to demonstrate checked exception (FileNotFound).
42. Program to demonstrate unchecked exception (ArithmeticException).
43. Program to create a simple Applet and display text.
44. Program to demonstrate applet lifecycle (init, start, paint).
45. Program to pass parameters to an Applet using the APPLET tag.
46. Program to create a thread using the Thread class.
47. Program to create a thread using the Runnable interface.
48. Program to demonstrate multiple threads running together.
49. Program to demonstrate thread priorities.
50. Program to demonstrate synchronization.

Objective: The objective of the module is to make the student understand the basic concepts of anoperating system mainly the functionsof an operating system. The module introduces Linux operating system structure, concepts and commands. The objective of this course is to introduce students to the fundamental concepts of Linux and its role as an open-source operating system.

LearningOutcomes:

- Onsuccessfulcompletionofthecourse,studentswillbeabletounderstand:
- Operatingsystemfeatures,typesandfunctions
- Use Linux commands for file management, process handling, user and group management
- Write simple shell scripts for automation of tasks
- The hands-on practice can be done using any Linux distribution preferably Ubuntu Desktop Edition

Note:

UNIT-I

Operating Systems (OS): Introduction, its needs and services, Functions of an operating system Types of OS: Single-User, Multi-user, batch system, Multiprogramming, Multiprocessing and Real time Operating Systems, Parallel systems, Distributed systems- peer to peer system, client-server system. Operating system structure-Monolithic, Layered, Microkernel, Modular, Hybrid. Concept and purpose of virtualization.

UNIT–II

Operating System Functions, Linux, Features of Linux, Basic Command Syntax, Login , Logout, Shutdown commands, Files and directories: File Naming Conventions, Hierarchical file system: Concept of Root Directory, Home Directory, parent and Child Directory, System Directories in Linux, Absolute and Relative File path, Types of Files in Linux, File and Directory permissions and chmod command (symbolic and octal mode), File Ownership, Pipes, Filters, Input, output and Error Redirection.

UNIT-III

Vi Editor: Editing Modes, Save and Quit commands in vi, Cursor Movement Commands in vi, Copy and paste text, Delete Text commands in vi

Basic Linux File and Directory Handling commands with options: pwd, ls, cd, mkdir, rmdir, cd, cat, cp, rm, mv, wc, more, less, head, tail, clear, man, grep, tr, sort, cut, cmp, comm , diff, find, umask, chown

Process handling commands: foreground and background processes, sleep, fg, bg, kill, ps, nice, jobs, top

Basic Commands: date, banner, who, who am i, cal, bc, prompt, path

Using Wildcard Characters (*, ? and []) with file commands, Environment Variables

UNIT-IV

User and Group Management: Commands to create, delete, modify users and groups in Linux.

Passwords in Linux: passwd command, Structure of passwd file, sudo and su command, Aliases, File compression: tar and gzip, BASH Shell Scripting Programming Constructs: Create, save and run shell script file, Variables, echo and read commands, expr, command substitution, test command, Decision making constructs (if-else, if-elseif, case-esac), Loops (while, for, until), tput clear, tput cup. Basic shell programs.

Note: Paper will be set at the time of examination. Due weight-age may be given to the practical notebook and Assignments in evaluation.

Suggested List of Practical Assignments

Write shell scripts to

1. Display message "Hello World"
2. Display date and this month's calendar and shell used.
3. Display environment variables.
4. Change the values of environment variables.
5. Define, set, unset and display a variable
6. Make a variable read only Variable.
7. Assign values to variables using read command.
8. Accept a string to be searched in a given file.
9. Perform simple arithmetic operation.
10. Determines whether the file exits in home directory.
11. Accept user input for a scriptname and determine the permissions of the given file.
12. Input two string and assess whether one of the strings is null, both equal or not equal.
13. Createmenus using a switch case statement to show system configurations like:
    a. Currently logged user and his log name
    b. Your current shell
    c. Your home directory
    d. our operating system type
    e. Your current path setting
    f. Your current working directory
    g. Show the Currently logged number of users
    h. About your os and version, release number, kernel version
    i. output username, time and date and Whois logged on.
14. Print the sum of five numbers using while loop.
15. Calculate result of 'n' students (while, do, expr).
16. Copy a file from one directory to another
17. Find smaller of two numbers.
18. Swap values of two variables.
19. Find the greatest number.
20. Find factorial of a number
21. Print sum of n numbers.
22. Print multiplication table.

Level: L-300			NumberofTheoryHours:60

Objective: The objective of the course is to help learners to understand how fundamental digital components work together to form the building blocks of computer hardware and processing systems. It provides a solid foundation in how digital systems are structured and operate at the hardware level. The course aims to develop skills in working with number systems, performing conversions and arithmetic, and applying boolean algebra to simplify logic expressions. It introduces the design and analysis of combinational circuits as well as sequential circuits.

Learning Outcomes:
By the end of the course, students will be able to:

- Understand and perform operations with different number systems.
- Simplify and apply Boolean expressions to design digital circuits.
- Design and analyze combinational circuits like adders, multiplexers, and decoders.
- Understand and use flip-flops in sequential circuits such as counters and registers.

Note:

- The Question Paper will consist of Four Units.
- The examiner will set a total of nine questions, including two questions from each unit and one compulsory short answer question covering the entire syllabus.
- Students are required to attempt one question from each unit and the compulsory question.
- All questions carry equal marks unless specified.

UNIT – I

Overview of Computer Organization: Definition of computer organization, basic block diagram of computer; Introduction to Memory Unit.

Data Representation and Arithmetic: Number Systems and its conversions – Binary, Decimal, Octal and Hexadecimal; Signed Number Representation – sign-magnitude, 1's complement and 2's complement; fixed and floating-point representation, Two's Complement representation; Binary Arithmetic Operations: Addition, Subtraction, Multiplication and Division; Introduction to Computer Codes:BCD, Excess-3 Code, Gray Code

UNIT – II

Digital Logic and Gates: Boolean algebra - Boolean Laws, duality principle, De-Morgan's Theorem, simplification of Boolean algebra; Logic Gates: AND, OR, NOT; Universal Gates: NAND and NOR gates; XOR and XNOR Gates, Characteristics of Logic Gates (Fan-in, Fan-out, Power dissipation, Propagation Delay), Minterms and maxterms, standard and canonical form, Karnaugh map and minimization techniques, Don't care condition.

UNIT – III

Combinational Logic Circuits: Adders – Half and Full Adder, Full adder using two half adders, Subtractor – Half and Full Subtractor, n-bit parallel adder, n-bit binary adder, binary adder-subtractor, Multiplexer, Multiplexer tree, Demultiplexer, Applications of Multiplexer and Demultiplexers, Encoder, Decoder, Chip cascading – Design of 4 x 16, 5 x 32 decoder using 2 x 4 and 3 x 8 decoders.

UNIT – IV

Flip-flops : Latch, SR-FF, D-FF, JK-FF, T-FF, Race-Around Condition, Master-Slave JK-FF, Applications of flip-flops.

Sequential Circuit Design: Registers, Shift Registers: SISO, SIPO, PISO, PIPO; Bi-directional shift register, applications of shift registers; Counters: Asynchronous counters, mod counters, up-down counter, synchronous counters, design of synchronous counter.

Course Objective: The objective of this course is to introduce students to the fundamental concepts of Data Science, including data handling, preprocessing, visualization, and basic machine learning techniques. It aims to develop the ability to analyze data, draw meaningful insights, and understand the tools and technologies used in modern data-driven applications. The course prepares students to apply data science methods in real-life problem-solving.

Learning Outcomes: On successful completion of the course, students will be able to:

- Students will understand the basic concepts, scope, and life cycle of data science.
- Students will learn to preprocess, clean, and manage data using appropriate techniques.
- Students will be able to apply basic machine learning algorithms for regression, classification, and clustering.
- Students will develop skills in data visualization and exploratory data analysis.
- Students will gain awareness of real-world applications, tools, ethical issues, and emerging trends in data science.

NOTE:

- The Question Paper will consist of Four Units.
- Examiner will set a total of NINE questions comprising TWO questions from each Unit and ONE compulsory question of short answer type covering the whole syllabus.

UNIT I

Introduction to Data Science Meaning and importance of data science, types of data, data science life cycle, data collection methods, basics of Python/R, simple data operations, introduction to data analysis, and basic data visualization.

UNIT II

Data Preprocessing and Data Management Data cleaning, handling missing data, removing errors, data transformation, feature creation, reducing data size, basics of databases, simple SQL commands, basics of NoSQL, and introduction to data warehousing.

UNIT III

Machine Learning Fundamentals Introduction to machine learning, supervised and unsupervised learning, basic regression methods, simple classification methods, basic clustering, model checking methods, train-test split, cross-validation, and overfitting/underfitting concepts.

UNIT IV

Applications, Tools, and Emerging Trends Basics of big data, introduction to Hadoop and Spark, introduction to Power BI, introduction to Tableau, applications of data science in various fields, data privacy, ethics, and case studies (Retail – Product Demand Prediction and Healthcare – Early Disease Detection)

2. Identify the type of data (numerical, categorical, ordinal) for each column in a given dataset.
3. Plot a simple bar chart for categorical data using Matplotlib.
4. Plot a line chart to show the trend of any numeric column.
5. Write Python code to calculate mean, median, mode, variance, and standard deviation for a numeric column.
6. Perform basic string operations (split, replace, uppercase, count).
7. Detect and display missing values in a dataset.
8. Replace missing values using mean/median/mode.
9. Identify duplicate rows and remove them.
10. Write SQL commands for:
    Creating a table; Inserting records; Selecting data
11. Write SQL queries to filter data using WHERE, LIKE, ORDER BY.
12. Perform a JOIN operation between two SQL tables.

Objective: The objective of the course is to enable students to understand how dynamic web applications are created by using PHP to process user input, manage server-side logic, and interact with databases. The course aims to develop skills in writing PHP scripts, handling forms, managing sessions, and implementing authentication, while also focusing on secure coding practices. Students learn to generate dynamic content, connect PHP with MySQL, and build functional, data-driven web pages.

Learning Outcomes:

By the end of the course, students will be able to:

- Understand the basics of server-side scripting and PHP execution.
- Write PHP scripts to process user input and generate dynamic web pages.
- Handle forms using GET and POST methods.
- Connect PHP applications to databases for data storage and retrieval.
- Use sessions and cookies for user login and state management.
- Apply basic security practices to prevent common web vulnerabilities.

Note:

- The Question Paper will consist of Four Units.
- The examiner will set a total of nine questions, including two questions from each unit and one compulsory short answer question covering the entire syllabus.
- Students are required to attempt one question from each unit and the compulsory question.
- All questions carry equal marks unless specified.

UNIT – I

Introduction to Server-Side Scripting and PHP: Client-side vs server-side scripting, Need of server-side scripting in dynamic web development, Overview of web servers, Role of PHP in web development, PHP Installation (XAMPP/WAMP).

PHP Basics: PHP Syntax and structure, PHP Variables, constants and data types, Embedded PHP in HTML, Operators, expressions, operator precedence, comments, echo and Print statement.

Control structures: Conditional statements: if, if-else, nested-if, switch; looping structures: for, while, do-while, foreach; break and continue.

UNIT – II

Functions: Built-in PHP functions, User defined functions: function definition, formal parameter vs actual parameter, variable scope, file inclusion Statements

Arrays: Indexed, Associative and Multidimensional Arrays; Creating Arrays, The array() construct; Accessing Array elements, Iterating with each() and foreach(), Iterative functions: current(), next(), prev(), reset(), end().

Strings: String declaration and syntax, string operators, concatenation and assignment, The heredoc syntax, common string functions : string cleanup functions, case functions, string replacement, finding characters and substrings.

UNIT - III

Working with Forms and User Input: Super global variables, Creating forms using HTML, GET and POST methods, Retrieving form data in PHP, Validating user input, Handling file uploads in PHP.

Database Connectivity: Connecting to MySQL, MySQL Functions, Making MySQL queries, executing queries, fetching data sets, creating MySQL database with PHP; Integrating forms and Databases: Basic form submission to a database, editing data with an HTML form.

UNIT – IV

Sessions and Cookies: Understanding sessions, starting and ending sessions, working with session variables, encoding and decoding session variables, Introduction to cookies, creating and retrieving cookies, modifying and deleting cookies, cookie expiration and lifetime.

Error and Exceptional Handling : Types of PHP Errors (notice, warning, parse error), PHP Exceptions: try, catch and finally blocks, throwing an exception, creating custom exceptions, multiple catch blocks.

List of Practical

1. Write a PHP code to print your name, course, and current date & time.
2. Write a PHP code demonstrating variables and constants.
3. Write a PHP code to perform arithmetic operations (addition, subtraction, multiplication, division).
4. Create a PHP code to check whether a number is even or odd.
5. Write a PHP code to find the greatest number of any three given numbers using nested-if.
6. Write a PHP code to print the day of the week using a switch-case statement.
7. Write a PHP code to print multiplication table using loops.
8. Create indexed, associative, and multidimensional arrays and display their elements.
9. Write a PHP code to demonstrate various loop iterative functions.
10. Write a PHP code to demonstrate string cleanup functions
11. Write a PHP code to demonstrate string case functions.
12. Write a user-defined function to find the largest number in an array.
13. Write a PHP code to demonstrate file inclusion function – include()

14. Write a PHP code to demonstrate file inclusion function – require()
15. Create a form (using GET/POST) and display submitted user data on another page.
16. Write a PHP code to connect to a MySQL database
17. Create a registration form and insert the form data into a MySQL table.
18. Fetch and display all records from a database table in an HTML table.
19. Create a file upload form that allows users to upload an image with size/type validation.
20. Write a PHP code to create a cookie with a name, value and expiration time.
21. Write a PHP code that sets a cookie based on user input.
22. Write a PHP code to retrieve and display a session variable.
23. Demonstrate exception handling during database connection using try–catch.
24. Write a PHP code to Handle different types of exceptions using multiple catch blocks.
25. Write a PHP code to Create and throw a user-defined exception class.

Th	Pr	Cr	Theory External Marks : 90	Time Duration: 3 Hrs.
4	--	4	Theory Internal Marks : 10	
Level: L- 300			Number of Theory Hours : 60	

Course Objective: This course aims to make students understand the Cyber Security and its implications.

Learning Outcomes: On successful completion of the course, students will be able to:

- Understand the architecture and regulatory aspects of cyberspace and the key terminologies in cyber security.
- Identify and assess web-based attacks, network vulnerabilities and exploit various tools.
- Recognize and classify different types of cybercrimes and understand legal frameworks.
- Grasp data privacy principles including compliance with regulations.

NOTE:

- The Question Paper will consist of Four Units.
- Examiner will set a total of NINE questions comprising TWO questions from each Unit and ONE compulsory question of short answer type covering the whole syllabus.
- The students are required to attempt ONE question from each Unit and the Compulsory question.
- All questions carry equal marks unless specified.

UNIT-I

Introduction to Cyber security: Understanding Cyberspace: Meaning of cyberspace and its components like Computers, networks, websites and apps and how they work together, Internet vs World Wide Web, How data moves on the internet

Architecture of cyberspace: Users, devices, servers, networks, Internet infrastructure for data transfer: routers, ISPs, data centers, Internet Society and bodies involved in governance, Regulations of cyberspace and its needs

Cyber Security: Concept and need, Online threats, Basic security goals: confidentiality, integrity, availability (CIA Triad), Issues and challenges in cyberspace.

Cyber security terminologies: Attack, Attack vector, Attack surface; Threat, Vulnerability, Risk; Exploit and exploitation; Hacker types(white/black/grey hat); Controls and security measures; Authentication(passwords, biometrics); Access Control and Cryptography.

UNIT-II

Web and Browser Attacks: Browser based attacks, Web Attacks Targeting Users(phishing pages, fake forms etc.), Methods to steal user or website data, Email-based attacks (spam, attachments, spoofing)

Network Vulnerabilities: Overview of vulnerability, scanning and why is it done, open port / service Identification, Detecting services and versions, Traffic Probes, Vulnerability Probes, Examples of common vulnerabilities.

Tools for Vulnerability Scanning (Concepts Only): Open VAS, Metasploit, Netcat and Socat, Network Sniffers and Injection tools.

UNIT-III

Cyber-crimes and their types: Classification of cyber-crimes: Crimes targeting computers and mobiles, Crimes against women and children, Financial and online frauds, Social engineering attacks, Malware and ransom-ware attacks, Zero day and zero click attacks.
Cybercriminals modus-operandi: Simple understanding of planning and executing attacks, Hiding identity and maintaining anonymity, Typical methods used by criminals.
Reporting of cybercrimes: Filing complaints, Importance of evidence, Using national cybercrime portals, Remedial and mitigation measures.
Legal perspective of cybercrime: IT Act 2000 and its amendments (overview), Cyber offences covered under the Act, Punishments for cybercrimes
Agencies covering Cyber crimes in India: CERT-In, Cyber Crime Cells, Other national and state-level security organizations

UNIT-IV

Understanding Data: Data, meta-data, big data; Personal and non-personal data. Data protection and its importance.
Data Privacy and Data Security: Difference between data privacy and data security, Big data security: issues and challenges Principles of data protection, India's Personal Data Protection Bill and its compliance
International Data Protection Regulations: General Data Protection Regulations(GDPR), 2016, Personal Information Protection and Electronic Documents Act (PIPEDA), Basic comparison with Indian context
Security Tools and Threats: Firewalls and Packet Filtering, Password Cracking approaches (Basic explanation), Key loggers and Spyware, Virus vs Worms, Trojan and backdoors, Steganography, DoS and DDoS attack, SQL injection, Buffer Overflow attacks and attacks on wireless Networks.

Objective: To provide students with a strong foundation in computer networking concepts, architectures, and protocols, and to equip them with practical skills in designing, analyzing, and securing networks.

Learning Outcomes:

- Explain the fundamental concepts, types of networks, and reference models (OSI & TCP/IP).
- Analyze transmission media, switching, and multiplexing techniques.
- Apply error detection, flow control, and medium access protocols in data communication.
- Demonstrate understanding of routing algorithms, transport protocols, and application layer services.
- Evaluate network security mechanisms including firewalls, cryptography, and intrusion prevention.

UNIT-I

ComputerNetwork: Types of Networks: LAN, MAN, WAN Network Topologies: Bus, Star, Ring, Mesh, Tree, Hybrid, Modes of communication: Simplex, half duplex, full duplex, Uses of ComputerNetworks,OSIReferenceModel,TCP/IPreferencemodel,ComparisonofOSI with TCP/IP model.

Physical Layer: Transmission media: Wired transmissions (Twisted pair, Coaxial cable, Fiber optics), Wireless Transmission (Radio, Microwave, and Infrared), Switching: (Circuit Switching, Message Switching, Packet Switching), Multiplexing: (Frequency Division, Time Division, Wave Length Division).

UNIT–II

DataLinkLayer: Framing,Types of addresses: (unicast, multicast, and broadcast),Address Resolution Protocol (ARP),ErrorsDetectionandCorrectionCode:Check sum, CRC, Hamming code, Data Link Protocols for noisy and noiseless channels, Sliding Window Protocol: Stop and Wait ARQ, Go-back-N ARQ, Selective Repeat ARQ.

Medium Access Sub-Layer: Introduction to Static and Dynamic channel allocation, Random-access protocols ALOHA, CSMA, CSMA/CD, CSMA/CA, IEEE standards 802.3,802.11, Repeaters, Hubs, Bridges, Switches, Routers, and Gateways.

UNIT–III

Network Layer: Design Issues, network layer addressing, network layer datagram, IP addressed Classes. Sub netting-Sub network, Subnet mask, Routing Algorithm: Shortest Path Routing, Flooding,Distance Vector Routing,Link State Routing, Broadcast and Multicast routing, Routing Protocols: RIP, OSPF, BGP. Congestion control: Principles of Congestion Control, Congestion prevention policies, Leaky bucket and token bucketalgorithms.

Transport Layer: Design issues, Elements of transport protocols :Addressing, Connection establishment and release, Flow control and buffering, Introduction to TCP/UDP protocols.

UNIT–IV

Application Layer: Domain Name system (DNS), DNS name space, DNS Servers, World Wide Web, HTTP, e-mail: Architecture and Services, Message Component, Multipurpose Internet Mail Extensions (MIME), Simple Mail Transfer Protocol (SMTP), Post OfficeProtocol (POP), Remote Login and File Transfer Protocol.

Network Security: Fundamentals of Network Security, Sniffing and Snooping, Firewalls,Intrusion Detection and Prevention,Introduction to Cryptography, Substitution Ciphers,Transposition Ciphers,Symmetric-Key Algorithms,Public-Key Algorithms (RSA),Digital Signatures.

Paper Title: Management Information System

Paper Code: CSA-DSC-6(Maj)-605

Th	Pr	Cr	Theory External Marks : 90
4	--	4	Theory Internal Marks : 10
Level: L- 300			Number of Theory Hours : 60

Objective: The objective of this course is to provide students with a basic understanding of Management Information Systems and their role in supporting business operations and decision-making. It aims to introduce different types of information systems, explain how MIS is developed and used in organizations, and familiarize students with modern technologies and security issues related to MIS. The course helps students understand how information systems improve efficiency, productivity, and managerial decision-making.

Learning Outcomes:
By the end of the course

- Students will understand the basic concepts, components, and importance of Management Information Systems in organizations.
- Students will be able to identify and differentiate various types of information systems used at different managerial levels.
- Students will learn to analyze and design simple MIS using system development processes and tools.
- Students will understand the role of MIS in major business functions such as finance, marketing, HR, and operations.
- Students will gain awareness of emerging technologies and security issues related to information systems.

Note:

- The Question Paper will consist of Four Units.
- The examiner will set a total of nine questions, including two questions from each unit and one compulsory short answer question covering the entire syllabus.
- Students are required to attempt one question from each unit and the compulsory question.
- All questions carry equal marks unless specified.

UNIT I

Introduction to MIS Meaning and definition of MIS, nature and scope of MIS, role and importance of MIS, system and subsystem concepts, elements of a system, types of systems (open, closed, physical, abstract), data and information, quality of information, sources of information, components of information systems, MIS and decision making, types of decisions (structured, semi-structured, unstructured)

UNIT II

Types of Information Systems Classification of information systems, Transaction Processing System (TPS), Management Information System (MIS), Decision Support System (DSS), Executive Support System (ESS), Office Automation System (OAS), Knowledge Management System (KMS), Marketing Information System, Finance and Accounting Information System, Human Resource Information System, Production and Inventory Information System.

UNIT III

MIS Development Process System Development Life Cycle (SDLC), planning, analysis, design, implementation, maintenance, feasibility studies (technical, economic, operational, legal), tools of system analysis (Data Flow Diagram), MIS design process, input and output design, testing and evaluation of MIS.

UNIT IV

Emerging Trends, Security, and Applications Cloud computing, big data analytics, AI and machine learning in MIS, ERP systems (SAP, Oracle), information security issues, cybersecurity threats, ethical issues in MIS.

Paper Title: Internship/Community Work
Paper Code: CSA- Intern-1

Th	Pr	Cr	
0	2	2	Practical External Marks: 50
Level:			Number of Hours for Internship/Community Work: 60

- The Project will involve development of application/system software in industrial, commercial or scientific environment. The Project can be any application or Web Site using Database connectivity.
- Community work
    - May involve developing projects which may uplift the life of unprivileged or add to the betterment of society in large.
    - May also include educating people about the use of technology safely by adopting a 60-hour well-defined plan. However, it will be compulsory to show the outcome in the form of feedback from trained people. For training purposes, a tie up can be made with schools. Same study material and awareness campaign can be used for three to four different groups of minimum 20 people in each group.

Evaluation
A student will have to submit project report of Internship/Community Work which will be evaluated based on Project Report (10 marks), Presentation (10 marks), Viva-Voce (10 marks), and execution of the Project/Feedback of the Community work (20 marks).

COMPARATIVE STUDY OF RELIGION

SEMESTER-V

Judaism (DSC-MAJ-09)

Max. Marks : 100
DSC: 04 credits
Theory : 90 marks
Internal Assessment : 10 marks
Time : 03 hours
Level : 200

The course is designed for the students who want to pursue semester based graduate degree programme with Comparative Study of Religion as subject. It is open to any student drawn from multiple disciplinary back grounds after completion of 10+2 course. As one of the elective subject at the graduate level curriculum, it purports to develop a broad understanding of Indian Religions and awareness about the origin, features and purpose of different religions.

Learning Outcomes:

On the completion of the Course the students would be able to understand the relationship between Guru Nanak Sikh Religion and its literary representation.

Pedagogy:

The Pedagogy of course involves class room lectures, assignments, discussions, special lectures. Field trip and feedback from the students.

INSTRUCTIONS FOR PAPER-SETTER AND CANDIDATES:

Note: (i) For written paper, the students will be required to attempt five questions in all. Question No. I will be compulsory comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt nine answer type questions out of twelve. Question No. I would carry 18 marks (9X2).

In addition to it, Questions No. II to IX will consist of **eight** long answer (Essay Type) questions which will be further divided into four units with each Unit having **two questions** to ensure internal choice to the candidate. In all, each question in this section shall carry 18 marks and this section shall carry 72 marks (4X18).

Course Contents

Unit-I Early History: Creation and Development.The Patriarchs (Adam, Abraham, Moses and David)
Unit –II Tanakh (Torah, Nevi'im and Ketuvim).Talmud (Mishnah and Gemara)

On the successful completion of this course, the students will be able to learn about Terrorism and its relationship with India's National Security. They will be able to see various aspects of terrorism, and counter-terrorism measure of India.

Pedagogy of the Course Work

90% Lectures (including expert lectures)
10% Unit Tests, Snap Tests, assignments, attendance and class room participation

Note:

1. The Syllabus has been divided into four (4) units.
2. There shall be 9 questions in all.
3. The first question shall be short answer type containing 12 shortbe answered in about 25 to 30 words. The candidate is required toattempt any 9 short answer type questions i.e. 2 marks of each. It shallcarry 18 marks and shall be compulsory question.
4. Rest of the paper shall contain four (4) units and each unit shallhave two questions and the candidates shall be given internal choicei.e. the candidates shall attempt one question from each. All questionsshall carry 18 marks.
5. For the private candidates, who have not been assessed earlier forinternal assessment, the marks secured by them in theory paper willproportionately be increased to maximum marks of the paper in lieuof internal assessment.
   The paper setter must put note (5) in the question paper

Unit-I

Terrorism: Meaning, Concept, Philosophy and Historical Perspective
Causes of Terrorism: Social, Economic, Political and Religious

Unit-II

International Terrorism
State Terrorism & State-Sponsored Terrorism

Unit-III

Terrorism and National Security
Strategies of Combating Terrorism:

a) Counter-Terrorism Measures
b) Anti-Terrorism Measures

Unit-IV

India & Terrorism

a) Kashmir
b) Punjab
c) Parliament & Mumbai 26/11

Organization and Management of Early Childhood Care &Education
(THEORY)

Maximum marks:75 marks
Credit:3
Duration of class:3 hours per week
Theory Paper: 67 marks
Duration of Exam: 3 hours
Internal Assessment:08marks
Instructions for Paper Setter:
Question paper will have four sections A, B, C and D. Two questions will be framed from each Unit A, B and C. Students are required to attempt fourquestions in total, selecting atleast one question from each section. Section D is compulsory, which includes questions from the whole syllabus.

Learning Outcomes:

1. To know about the objectives of existing ECCE Programs.
2. To aware students about the Organization and Management of ECCE centers.
3. To acquaint students the services rendered of ECCE Programs.
4. To realize the importance of physical facilities and personnel.

UNIT- I

1. Existing ECCE programs in India-
i. Objectives
ii. Organization and management
iii. Services rendered
iv. Critical evaluation.

UNIT-II

2. Physical facilities for Setting up of ECCE centres:
i. Locality and building
ii. Furniture, equipment and materials
iii. Organization of indoor and outdoor spaces

Unit-III

3. Management for setting up of ECCE centers:
Qualifications, responsibilities, skills, competencies and personal qualities of the following:
i. Supervisor
ii. Teacher /Day-care Worker
iii. Supporting staff/ Helper
iv. Experts, Consultants, Resource Persons
v. Administrative Personnel

Learning Outcomes:

1. To introduce the students about the programs, curriculum planning and implementations.
2. To understand the long -term and short- term planning of programme.
3. To gain knowledge of weekly and daily working plan for an ECCE set- up.
4. To know the evaluation of ECCE Programme.
5. To understand the management of resources.

UNIT-I

1. Programs and curriculum planning and implementation:
   - **a.** Planning a need and context based programme.
   - **b.** Long term and short-term planning of programme.
   - **c.** Preparations of weekly and daily working plan for an ECCE set-up

UNIT-II

2. Evaluation of ECCE Programme:
   - **a.** Need for evaluation
   - **b.** Types and strategies used
   - **c.** Role of supervisor and teacher
   - **d.** Maintenance of records
   - **e.** Self-evaluation – learning process & outcomes

UNIT-III

3. Management of Resources:
   a. Finance: Need and methods of generating funds, budgeting, savings and investments.
   b. Time Management: Proper utilization with reference to Program, children, self and institution.
   c. Support Services and Referral: Identifying maintaining liaison, collaborating.

The student successfully securing 144 credits will be awarded B.A.degree.											

Notes:

1. In the first semester student is offered three different subjects A, B & C.
2. At the end of second semester each student has the option to choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at the end of the second semester.
3. The student who chooses multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in Minor subject.
4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.A. HONOURS with research, on the condition that the Institution is a PU approved Research Centre

5. The student opting for Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain atleast 12 credits in that subject(s).
6. The student exiting the programme after one year securing 48 credits will be awarded UG Certificate provided he/she secures 4 credits from summer internship/community work. Further, the student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secure 4 credits from summer internship. The student successfully securing 144 credits will be awarded BA degree.
7. Language paper chosen as MIL-1 and MIL-2 should be in the same subject.
8. Once Major and Minor papers are chosen in 3rd semester, the same will continue as Major and Minor subject in the subsequent semesters.
9. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write Dissertation of 08 credits in one of the two Major subjects.

SEMESTER-V

ECO-DSC-9 (MAJ-5/MIN-5) 501: INTERNATIONAL ECONOMICS

Topology of the code	Major
Course Duration/LTP (Lectures, Tutorials, Practicals)	L= 60 hours (4 hours a week for 15 weeks= 01 semester), T=0, P=0
Credits	4
Max. Marks	100 Marks = Theory 90 marks + Internal Assessment 10 marks
Time	3 hours
Level	300

Learning Outcomes
This course introduces students to key concepts in international economics. Unit I covers classical and modern trade theories, including Absolute and Comparative Advantage, Heckscher-Ohlin, and Intra-industry trade. Unit II focuses on terms of trade, tariffs, non-tariff barriers, and regional economic integration. Unit III examines foreign exchange markets, exchange rate systems, and balance of payments adjustments. Unit IV explores international monetary systems, the role of the IMF, Eurocurrency markets, and the causes and impacts of financial globalization and crises.

Pedagogy of the Course Work: 90% Class room teaching
10% Internal Evaluation

Instructions for Paper-setter and candidates:
The maximum mark for the paper will be 100. The question paper will be of 90 marks and continuous evaluation 10 marks. The time allowed will be 3 hours.

The paper-setter must put a note in the question paper in this regard.

There shall be **9** questions in all
The first question is compulsory comprising 12 short answer-type questions spread over the whole syllabus. The candidates are required to attempt 9 questions. Each question shall be of two marks (9 x 2= 18).
Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 18 marks (18x4=72).

UNIT- I

What is international economics about? Theories of Absolute Advantage, Comparative Advantage and Opportunity Costs.
Heckscher-Ohlin Theory of Trade – Its Main Features, Assumptions and Limitations.
New Approaches to Trade Theory: The Product Cycle Theory, Technology Gap Theory, Intra-industry trade.

UNIT- II

Concept and types of Terms of trade.

Effects of Tariff under Partial Equilibrium Analysis. Non-tariff Barriers. Political Economy of Non-tariff Barriers.

Economic Integration: Concept and Forms of Regional Integration; Static and Dynamic Effects of Custom Union.

UNIT-III

Foreign Exchange Market: Fixed versus flexible exchange rates, Concept, Role and Types of Foreign Exchange Transactions: Speculation, Arbitrage and Hedging.

The Process of Adjustment in the Balance of Payments under Fixed and Flexible ExchangeRate Systems.

UNIT-IV

International monetary systems: International Monetary Fund; Eurocurrency Market.

Financial Globalization and Financial crises: Causes and Case Studies.

Time	3 hours
Level	300

Learning Outcomes: The learning outcomes of this course will equip students with foundational knowledge in mathematics and statistics relevant to economic analysis. In Unit I, students will understand elementary set theory, relations, functions, limits, and continuity, along with the basics of matrices and determinants, and methods for solving linear equations using matrix techniques and Cramer's Rule. Unit II will introduce students to the scope and concepts of statistics, data collection, classification, and presentation, as well as measures of central tendency including mean, median, mode, and partition values. In Unit III, students will learn various measures of dispersion, including standard deviation and Lorenz curve, and understand the concepts of skewness and kurtosis. Unit IV will provide students with the ability to analyze relationships between variables through correlation and regression, including interpretation of Pearson's and Spearman's coefficients, scatter diagrams, and simple linear regression analysis.

Pedagogy of the Course Work: 90% Class room teaching

UNIT - I

Elementary Set Theory, Relations and Functions, limit and Continuity.
Matrices and Determinants: Definition and types of Matrices; Operations (sum, difference product and transpose); Properties of Determinants; Calculation of Values of Determinants up to Third Order, Adjoint and Inverse of a Matrix. Solution of a System of Linear Equations (upto 3) by Matrix Inverse Method and Cramer's Rule.

UNIT – II

Introduction to Statistics: Meaning and Scope, Concepts of Population and Sample. Scales of Measurement - Nominal, Ordinal, Interval and Ratio. Variables and Attributes, Collection and Types of Data, Tabulation and Classification of Data, Graphical and Diagrammatical Presentation of Data.

Central Tendency: Meaning, Significance and Measurement using Mean (Arithmetic mean, Geometric and Harmonic Mean) Median, Partition Values and Mode.

UNIT - III

Dispersion: Meaning, Significance and Characteristics for an Ideal Measure; Measures of Dispersion: Range, Quartile Deviation, Mean or Average Deviation, Standard Deviation and Lorenz Curve.

Skewness and Kurtosis: Meaning and Measures.

UNIT - IV

Simple Correlation: Meaning, Types, Significance, Correlation and Causation; Scatter Diagram, Karl Pearson's and Spearman's Correlation Coefficient. Probable error.

Regression: Meaning and Significance, Difference Between Correlation and Regression, Simple Linear Regression and Estimation of Parameters (Slope and Intercept). Standard Error.

Suggested Practical Work: Use of Microsoft Excel in solving Simple Data Analysis.

Level	300

Learning Outcomes: The learning outcomes of this course will provide students with a comprehensive understanding of the evolution of economic thought. In Unit I, students will explore Pre-Classical Economic Thought, focusing on Mercantilism and Physiocracy, with an emphasis on the ideas of Quesnay and Turgot. Unit II will enable students to understand the Classical and Marxian Political Economy, examining the contributions of Adam Smith, Ricardo, J. S. Mill, and Karl Marx on value, distribution, and economic development. In Unit III, students will gain insights into the reaction against Classicism, studying socialist and nationalist thinkers like Sismondi, Saint-Simon, Fourier, and the Subjective School, including Menger, Weiser, and Bohm-Bewark. Finally, Unit IV will provide students with a solid foundation in Neo-Classical Economics, including Marshall's theory of the firm and partial equilibrium, as well as Keynes' concepts of effective demand, consumption, investment, and the inflationary gap.

Unit-I

Pre-Classical Economic Thought: Mercantilism: Mercantilist ideas, regulations of economic life, leading theory of Mercantilist school, Physiocracy: ideas with special reference to Quesnay and Turgot.

Unit-II

Classical and Marxian Political Economy: The classical tradition: Adam Smith, Ricardo, J. S. Mill and Karl Marx on value, distribution and development.

Unit-III

Reaction Against Classicism: Socialist and Nationalist thinkers, Sismondi, Saint-Simon, Robert Brown and Fourier, Subjective School: Menger, Weiser and Bohm Bewark.

Unit-IV

Neo-Classical Economics: Main features.
Marshall: Scope of Economics, theory of firm, time-element, partial equilibrium analysis.
Keynes: Concept of effective demand, consumption, investment, inflationary gap.

Learning Outcomes:This course on the Economics of Agriculture covers the nature, scope, and interdependence between agriculture and industry, with a focus on agricultural development challenges in developing countries and its contribution to India's economic growth. Unit II examines models of transforming traditional agriculture, including those by Schultz, Mellor, and Hayami-Ruttan. Unit III discusses land reforms, farming systems, farm size-productivity relationships, agricultural price policy, and taxation in the context of India. Unit IV explores the New Agricultural Strategy and Green Revolution, issues faced by small farmers and agricultural laborers, agricultural credit, and surplus utilization, with a special focus on India. The course also covers agriculture in GATT and WTO negotiations.

UNIT – I

Economics of Agriculture: Its nature and scope, Interdependence between agriculture and industry. Nature and problems of agricultural development in developing countries. Contribution of Agriculture to India's Economic Development.

UNIT – II

Transforming Traditional Agriculture: Schultz, Mellor's and Hayami-Ruttan's models.

UNIT – III

Land reforms and system of farming. Farm size and productivity relationship. Agricultural price policy, Agricultural taxation (All these topics should deal with special reference to India).

UNIT – IV

New agricultural strategy and Green Revolution. Problems of small farmers and agricultural labourers. Agricultural credit, marketable and marketed surplus. Surplus and its utilization. (All these topics would deal with special reference to India). Agriculture in GATT Negotiations and WTO.

Credits	4
Max. Marks	100 Marks = Theory 90 marks + Internal Assessment 10 marks
Time	3 hours
Level	300

Learning Outcomes: This course on Population Economics explores key concepts such as population theories (Malthusian, Optimum, and Demographic Transition) and their relationship with economic development. Students will examine population structure, including age, gender, workforce participation, and fertility-mortality trends, with a focus on India. Migration patterns, urbanization trends, and their socio-economic consequences are also discussed. The course concludes with an analysis of India's post-independence population policy and its impact on demographic changes.

Instructions for Paper-setter and candidates:
The maximum mark for the paper will be 100. The question paper will be of 90 marks and continuous evaluation 10 marks. The time allowed will be 3 hours.

The paper-setter must put a note in the question paper in this regard.

There shall be **9** questions in all
The first question is compulsory comprising 12 short answer-type questions spread over the whole syllabus. The candidates are required to attempt 9 questions. Each question shall be of two marks (9 x 2= 18).
Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 18 marks (18x4=72).

UNIT – I

Introduction to Population Economics
Theories of Population: Malthus, Optimum; Demographic transition theory.
Population and Economic Development: inter-linkages

UNIT – II

Population Structure and Characteristics: Impact of Population growth on the age and gender structure
Economic Composition of Indian Population: Workforce Participation & Occupational Structure
Fertility Mortality: Concepts and Measurement
Infant Mortality in India: Cause and Trends
Facility: Current Status

UNIT – III

Migration: Meaning, Causes and Consequences. Migration in India (Rular and Urban, Male-Female): Causes and Trends
Urbanisation: Meaning, Determinants and Consequences, Trends of Urbanisations in India.

UNIT – IV

Population Policy in India: Features of the Population Policy in the post-independence era.

Learning Outcomes: By the end of this course, students will gain a solid understanding of econometrics, including its nature, scope, and methodology, and how to specify and estimate econometric models. They will learn to apply simple and multiple regression models using the Ordinary Least Squares method, understand the properties of least squares estimators, and evaluate model fit using R-squared and Adjusted R-squared. Students will also be able to test the significance of regression coefficients, conduct hypothesis testing, and address econometric problems like multicollinearity, autocorrelation, and heteroscedasticity. The course will cover specification errors, such as the omission of relevant variables or inclusion of irrelevant ones, and the impact of measurement errors in variables. Additionally, students will learn about model selection criteria and the use of dummy variables in regression models.

UNIT- I

Introduction: Nature and Scope of Econometrics, Methodology of Econometrics. Specification ofan Econometric Model. Nature of Data used in Estimation.
Simple and Multiple Regression Models: Estimation of Model by Method of Ordinary LeastSquares; Properties of the Least Squares Estimators, the Gauss-Markov Theorem. Goodness of Fit-R Square & Adjusted R Square.

UNIT –II

Testing Significance of Regression Coefficients: Confidence Interval and Hypotheses Testing.
Econometrics Problems: Nature, Consequences, Detection and Remedial Measures of the Problemsof Multicollinearity and Autocorrelation.

UNIT- III

Econometrics Problems: Nature, Consequences, Detection and Remedial Measures of the Problem of Heteroscedasticity.

Specification Errors: Tests of Specification and Misspecification: Omission of a Relevant Variable;
Inclusion of Irrelevant Variable.

Learning Outcomes: By the end of this course, students will have a comprehensive understanding of economic growth and development, including key concepts like PQLI and HDI, and the main features of underdeveloped economies. They will analyze various growth models such as the Classical, Harrod-Domar, and Solow models, as well as theories of dualism and income distribution, including Kuznets' inverted U curve. Students will also explore strategies for economic development, including balanced vs. unbalanced growth, Rostow's stages of growth, and the theory of big push. The course covers the role of planning in developing countries, investment criteria, and emerging strategies like export promotion and import substitution. Finally, students will understand the concept of sustainable development, its concerns, indicators, and potential solutions.

UNIT – I

Economic Growth and Development: Concept and Measurement (Concepts of PQLI and HDI) Main Features of an Underdeveloped Economy. Determinants of Economic Development. Capital Formation: It's Source, Nurkse's Thesis of Disguised Unemployment. Lewis Theory of Unlimited Supply of Labour.

UNIT – II

Classical Model of Growth; Harrod-Domar Model of Economic Growth; One Sector Neo-classical Model of Growth. Solow Model of Growth. Dualism: Social and Technological. Relationship between income distribution and economic development (Kuznets' inverted U curve).

UNIT – III

Theory of Big Push. Leibenstein's Critical Minimum Effort Thesis. Strategies of Economic Development: Balanced Vs. Unbalanced Growth. Rostow's Theory of Stages of Growth.

UNIT – IV

Theory of Planning in Developing Countries: Need, Objectives, Strategies and Problems of Planning. Price Mechanism and Planning. Investment Criteria. Choice of Technique. Emerging Strategies: Export Promotion and Import Substitution Strategy.
Sustainable development: Meaning, concerns, indicators and remedial measures**.**

UNIT - I

Differentiation: Simple and Partial Derivatives, Differentiation of Simple functions – Polynomial and Exponential Functions. Maxima and Minima of Functions of One Variable only their applications of micro and macroeconomics.

UNIT – II

Linear programming Problem: Meaning, Advantages, Limitations, Basic Terminology, Formulation of linear programming Problems and Solution by Graphical Method.
Theory of Probability: Introduction, Definitions and Use of Addition and Multiplicative Theorem, Conditional Probability and Bayes' Theorem.

UNIT – III

Time Series: Meaning, Components, Models, Determination of trend and short-term oscillations. Least Square and moving average method.

Interpolation and Extrapolation: Binomial Expansion Method, Newton's Method (Advancing difference) and Lagrange's Method.

UNIT – IV

Index Numbers:Meaning, Types, Uses and Problems in the Construction of Index Numbers; Methods of Constructing Simple and weighted Price and Quantity Indices (Laspeyres's, Paasche's and Fisher's Index numbers for weighted index numbers); Tests of Adequacy. Fixed Base Index, Chain Base Index, Base Conversion, Base Shifting, Splicing, Deflating, Consumer Price Index.

Learning Outcomes: This course covers key concepts in industrial economics, including the nature of firms, industries, and markets, as well as different organizational forms and firm motives. It examines market structure factors such as concentration, product differentiation, and economies of scale, and explores how theseinfluence profitability. The course also looks at firm growth through vertical integration, diversification, and innovation, while addressing constraints like demand and managerial factors. It covers the theory of industrial location, focusing on centralized vs. balanced regional development, and the patterns of industrial concentration in India. Finally, it discusses India's industrial policy post-independence, the reasons for decelerating industrial growth, and the role of state industrialization.

UNIT-I

Scope and methods of Industrial Economics: Basic concepts of firm, industry and market; Organisational forms and alternative motives of the firms; Industrial structure and economic development.

UNIT-II

Market Structure: Sellers' concentration, product differentiation, conditions of entry and economies of scale, market structure and profitability. Growth of Firms: Vertical integration, diversification, mergers and innovation; constraints on growth demand, financial and managerial.

UNIT-III

Theory of industrial location: Contribution of Weber and Sergent Florence, centralized vs. balanced regional development, industrial concentration and dispersal in India.

UNIT-IV

Industrial policy since independence: Industrial development under plans and reasons for deceleration of industrial growth, Growth of State industrialization in India.

Learning Objectives of the Course:

- To broaden understanding of the students regarding the various schools of literary criticism and their different methodologies.
- To familiarise the students with the diverse worldviews and help them relate literary texts to their own thoughts and lives.
- To help students understand that a text can yield multiple meanings with none being privileged to the other and thus make them conversant with the vitality of the concept of critical pluralism.
- To equip the students with the skill of critical and comprehensive literary analysis.

Course Outcomes:

At the end of this course, students will be able to:

- Show familiarity with major critical approaches and comprehend diverse methodologies in their specific historical and cultural contexts and positionalities.
- Develop and practice close reading skills; conduct own research and analysis and engage in critical deliberations.
- Navigate through texts with a degree of precision and practically apply these methodologies to literary texts and other forms of cultural production.

Pedagogy of the Course:

a) The paper requires 3 hours of lecture teaching per week and 2 hours of practical per week during which students shall participate in discussions and critical deliberations on the texts.
b) Students will select a theoretical movement and use relevant course readings to describe, analyze and apply methodologies of the selected theoretical movement to a selected text of choice (literature or media, as approved by the teacher). The critical textual analysis (6-8 pages) will be discussed in the class and will be submitted by the student as assignment.

Discipline Specific Course-20/Major

Course Title: **Indian Women's Writing**
Course Code: **ENG-DSC-20 (MAJ)-605**
Typology of Course: **Discipline Specific Course/Major**
Level: **300**
Course Duration: 75 hours in a semester (3hrs direct teaching + 2hrs practical)
Credits: 4
Maximum Marks: (90marks theory + 10 marks internal assessment)

Practical & Tutorials in all subjects to the capacity of only 20 students per lecture class.

Note:- There shall be no separate practical exam at the end of the semester.

Learning Objectives of the Course
The objective of the paper is to introduce students to the emerging counter canon of Women's literary production in India. Covering vast sweeps of time, the paper includes voices ranging from the 12th century to the present times. Through the inclusion of linguistically diverse texts in translation the students will be empowered to bridge the gap of cultural and linguistic divides. Translations are included from numerous languages including Kannada, Marathi, Punjabi, Hindi, Bengali and Tamil. Generic variations are offered to allow students a deeper understanding of representative texts. By destabilizing consolidated patriarchal narratives through Women's Writing. This paper will allow students to comprehend their experiences in relation to the anxieties and influences of the contemporary times.

Pedagogy of the Course
The paper requires 3 hours of direct teaching and 2 hours of practical classes per week. In the practical classes, the students should be asked their own autobiographies, and the narratives about their mothers, and other women in the family. Comprehensive critical understanding of the writers age, theme, style, and ideological stances should be ensured through critical discourses and assignments on the subject. Out of a total of 100 marks students would be evaluated externally for 90 marks and internally for 10 marks. The internal assessment would be given on the basis of attendance, class participation and mid-term test score. The suggested reading list is only to provide a background study to the paper. No direct questions will be asked from the same.

Paper : Life Study (Full Figure), (Practical)

Credits: 04

Total Marks: 100

Course Description

Life Study (Full Figure) is a core practical paper designed to develop students' understanding of the human figure through direct observation. The course emphasizes anatomical accuracy, proportion, posture, movement, and expressive quality through both **drawing and painterly approaches**, enabling students to translate visual perception into structured, expressive, and meaningful artistic representations.

Course Objectives

The course aims to promote a holistic, skill-based, and learner-centric approach to art education. The objectives are to:

- Develop observational skills through direct study of the human figure.
- Enhance understanding of human anatomy, proportion, and structural relationships.
- Train students to capture gesture, posture, balance, and movement.
- Encourage sensitivity towards expressive, emotional, and aesthetic aspects of the human form.
- Promote experiential learning and the development of an individual visual language in both drawing and painting.

Course Content

Through this course, students will develop an understanding of the following aspects of Life Study:

Fundamentals of Life Study

- Importance of life study in visual art
- Proportion and measurement of the human figure
- Line quality, contour, and mass drawing

Anatomy and Structure

- Basic skeletal structure
- Muscular system relevant to surface form
- Anatomical basis of posture and movement

Posture, Gesture, and Movement

- Standing, sitting, and reclining poses
- Gesture and action studies
- Balance and weight distribution

Light, Shade, and Form

- Tonal values and modelling of form
- Light source and shadow
- Volume, depth, and three-dimensionality in drawing and painting

Expressive and Contemporary Approaches

- Expressive figure studies
- Painterly interpretation of the human figure
- Development of personal style through life study

Medium and Materials

Students may use any of the following media:

- Pencil (graphite)
- Charcoal
- Conte crayon
- Ink
- Watercolour
- Poster colour
- Acrylic colour
- Oil colour

Support materials: Drawing sheets, oil sketching paper, cartridge paper, newsprint, erasers, fixative, drawing board, easel (if required).

Learning Outcomes

After completion of the course, the student will be able to:

- Render the full human figure with correct proportion, structure, and balance.
- Apply anatomical knowledge in both linear and tonal/painterly studies.
- Use line, tone, colour, and light–shade effectively to suggest form and expression.
- Demonstrate confidence in observational drawing, painting, and visual analysis.

Scheme of Examination (Practical)

- Basic skeletal structure of the head and face
- Muscular system relevant to facial expressions
- Anatomical basis of facial features and expressions

Posture, Gesture, and Expression

- Capturing likeness and character

- Facial expressions and emotions
- Balance and proportion in portrait composition

Light, Shade, and Form

- Tonal values and modelling of facial features
- Light source and shadow
- Volume, depth, and three-dimensionality in drawing and painting

Expressive and Contemporary Approaches

- Expressive portrait studies
- Painterly interpretation of the subject
- Development of personal style through portrait study

Medium and Materials

Students may use any of the following media:

- Pencil (graphite)
- Charcoal
- Conte crayon
- Ink
- Watercolour
- Poster colour
- Acrylic colour
- Oil colour

Support materials: Drawing sheets, oil sketching paper, cartridge paper, newsprint, erasers, fixative, drawing board, easel (if required).

Learning Outcomes

After completion of the course, the student will be able to:

- Render a portrait with correct proportion, structure, and likeness.
- Apply anatomical knowledge in both linear and tonal/painterly studies.
- Use line, tone, colour, and light-shade effectively to suggest form and expression.
- Demonstrate confidence in observational drawing, painting, and visual analysis.

Scheme of Examination (Practical)

	Max.Marks	*Max. Time*
1. Portrait Study	45	5 hours
2. Submission works	30	
Total	75	

_____

Paper: Portrait Study

Portrait study : From live Model or Cast-Monochrome in any medium,½ Imperial Sheet. Emphasis should be on structure, proportion, foreshortening, textural values, posture and individuality of the model.

Submission of Artworks: 40 Marks (based on related work)

Marks for submission will be awarded based on the work completed during the session. A minimum of 5 artworks(Size: 15 inches X 22 inches), along with a sketchbook, must be submitted in this section. Submission marks will be awarded jointly by both internal and external examiners. In case of a difference of opinion, each examiner may mark separately, awarding marks out of 50% of the total submission marks.

NOTE :

As this paper is a 3 credit practical course, minimum of 6 hours' teaching per week shall be assigned to the subject.

Guidelines for Internship in Fine Arts

Bachelor of Arts (BA) – Semester V , Panjab University, Chandigarh

1. Introduction & Objective

The internship is a pivotal component of the BA Fine Arts curriculum, designed to bridge the gap between academic theory and the practical application of art in society. This program explores art as a visual language, a decorative element, and a functional tool. Students gain real-world exposure, understanding how artistic principles—such as form, composition, and positive/negative space—influence social conditions, public spaces, and industrial design.

2. Core Objectives

- **Practical Application:** Applying classroom concepts—design principles, anatomy, and color theory—to professional briefs and societal needs.
- **Professional Induction:** Exposure to the ethics, culture, and rigorous workflows of the creative industry.
- **Skill Diversification:** Developing soft skills such as teamwork, client communication, and project management.
- **Career Exploration:** Identifying specialized interests in fields like Graphic Design, Mural Art, or Digital Photography.
- **Networking:** Building a professional portfolio and industry connections to enhance post-graduation employability.

3. Course Structure

- **Credits:** 04Credits.
- **Duration:** Minimum of 60 hours of documented fieldwork/training.
- **Timeline:** The internship must be undertaken after the completion of 4th-semester examinations and concluded during the 5th semester.

4. Approved Internship Pathways (Corporate/Studio Placement)

Students may pursue internships within the following professional venues:

1. **Professional Artist Studios:** Direct mentorship focusing on studio practice, technique refinement, and exhibition preparation.
2. **Government & Public Sector:** Roles within departments dedicated to art promotion, cultural documentation, or public design.
3. **Advertising & Design Firms:** Graphic design, brand identity, animation, and UI/UX design.
4. **Specialized Creative Labs:** Advanced applications of CAD, 3D modeling, and V-Ray rendering.
5. **Fashion & Textile Industry:** Design roles within export houses, textile mills, or boutique fashion labels.
6. **Educational & Art Academies:** Assisting in curriculum delivery, gallery management, or archival work.
7. **Exhibition & Stage Design:** Curation, theater set design, and the creative arrangement of heritage displays.
8. **Photography & Visual Journalism:** Professional photography studios, media houses, or independent masters.

5. Technical Specifications: Photography & Visual Documentation

This pathway focuses on the transition from "taking a picture" to **"constructing a visual narrative."**

I. Core Specializations

- **Product & Advertising:** Focus on lighting geometry and texture rendering for commercial briefs.
- **Documentary & Photo-Journalism:** Capturing social imagery and heritage sites with a focus on narrative flow.
- **Portraiture & Fashion:** Understanding human anatomy in light and the psychological subject-photographer interaction.
- **Architectural Photography:** Perspective correction and the play of light on built forms (e.g., Sultanate/Mughal structures).
- **Wedding Photography & Social Imagery:** A study in **Visual Sociology**. Focuses on candid artistry (capturing *Abhanga/Tribhanga* postures), macro-documentation of cultural artifacts (textiles/jewelry), and managing "Mixed Lighting" environments.

II. Technical Competencies

- **Manual Handling:** Mastery of the **Exposure Triangle** (Aperture, Shutter Speed, ISO) and lens selection.
- **Lighting Artistry:** Application of Three-Point Lighting, high-key/low-key setups, and modifiers (reflectors/softboxes).
- **Post-Processing:** Non-destructive editing (Lightroom/Photoshop), color grading, and RAW file management.
- **Compositional Theory:** Intentional use of the Rule of Thirds, Leading Lines, and the balance of **Positive and Negative Space**.

6. Project Work Guidelines (Alternative to Corporate Placement)

In lieu of corporate placement, students may execute a **Large-Scale Project** to foster community responsibility.

I. Project Categories & Scope

- **Category A: Group Mural (Public Art):** Collaborative assignments on permanent surfaces (min. 6ft x 4ft). Themes include Indian Heritage, Social Awareness, or Modern Abstraction.
- **Category B: Institutional Events & Exhibition Management:** Planning layouts, curation, and mounting for exhibitions or thematic installations (Entrance installations, Rangoli, Foyer dressing).
- **Category C: Theater Design & Heritage Displays:** Designing backdrops, props, and mobile cultural displays (Tableaux) for the PU Youth & Heritage Festival.
- **Category D: Thematic Photography Project (Visual Research):** A comprehensive photographic study.
    - **Scope:** A curated series of 20 conceptual photographs.
    - **Themes:** *Historical Architecture of India*, *Traditional Craftsmen at Work*, or *Urban Transitions*.

II. Mural Mediums & Technical Specifications

- **Painted Murals:** Fresco-secco or Acrylic Emulsion. Requires surface priming, grid-based enlargement, and varnishing.
- **Relief & Assemblage:** Terra Cotta/Clay work or Tile/Mosaic works (direct/indirect application).
- **Eco-Art (Best Out of Waste):** Utilizing industrial scrap or discarded metal while ensuring structural integrity.

III. Team Composition & Collaboration

- **Maximum Group Size:** For Group Murals (Category A), Institutional Events (Category B), and Theater Design (Category C), the project may be undertaken by a **maximum of 06 students**.
- **Individual Accountability:** While the output is collaborative, each student must maintain an individual logbook and document their specific contribution (e.g., Lead Illustrator, Material Specialist, Documentation In-charge) to ensure fair assessment during the Viva Voce.
- **Solo Projects:** Category D (Thematic Photography) remains an individual pursuit to ensure the development of a personal visual voice.

7. Submission & Technical Report Requirements

All projects require a formal **Project File** containing:

1. **MOU / Permission Letter:** Formal authorization from the host institution or site owner.
2. **Visual Documentation:** High-resolution "Before," "In-Progress," and "After" photographs. (Photography students must include a **Digital Contact Sheet**).
3. **Design Portfolio:** Preliminary sketches, mood boards, maquettes, or a **Storyboarding/Shot-list**.

4. **Technical Report:** A comprehensive document detailing material compatibility, execution processes (lighting diagrams for photography), sustainability plans, and workflow breakdown.

8. Assessment & Certification

- **Logbook:** Students must log 60 hours of fieldwork as per University NEP norms.
- **Certification:** Verification of completion from the Host Institution Head or the HOD.
- **Final Viva:** Assessment concludes via a classroom presentation and a *viva voce* based on the Technical Report.

Distribution of Assessment Parameters:

Component	Weightage	Focus Area
Technical Report & Logbook	40%	Documentation, scaling accuracy, and hours.
Portfolio/Outcome	30%	The quality of the mural, photos, or 3D models.
Viva Voce / Presentation	30%	Theoretical knowledge, ethics, and "defending" the work.

9. Societal Impact

Beyond personal skill development, the internship emphasizes the artist's role as a citizen. By engaging with public spaces and government bodies, students learn how visual art can raise awareness and contribute to the cultural fabric of society, fostering a sense of social responsibility.

Specimen of certificate of completion**:**

[Organization/Institution Name] [Address/Logo]

CERTIFICATE OF COMPLETION

Ref. No.: [Insert Reference Number]

Date: [Insert Date]

This is to certify that **[Student Name]**, a student of **BA Fine Arts (Semester 5)** at **[College Name]**, has successfully completed their professional internship from **[Start Date]** to **[End Date]**.

Internship Pathway: [e.g., Advertising & Design / Photography / Project Work]

Project/Assignment Title: [Insert Name, e.g., Visual Narrative of Mughal Architecture / Brand Identity Development]

Nature of Work: The candidate was engaged in [Insert specific tasks, e.g., 3D Modeling & V-Ray Rendering / Studio Practice & Exhibition Prep / Digital Narrative Construction].

Internship Details:

- **Total Hours Logged:** [Insert Hours, e.g., 60 Hours]
- **Credits Earned:** 2 Credits (as per NEP 2020 Norms)

During the course of this internship, the candidate was inducted into the professional ethics, culture, and rigorous workflows of the creative industry. **[Student Name]** has demonstrated a high level of professional discipline, creativity, and technical proficiency in their assigned tasks. Their conduct during the internship was exemplary.

We wish them the very best in their future artistic and professional endeavors.

Semester VI

Paper Code: BAFA-MAJ 601

Paper : Composition (Practical)

Credits: 4

Total Marks: 100

Course Description

By engaging with composition, students develop the ability to organize visual elements creatively to express ideas, emotions, and experiences, resulting in balanced, unified, and aesthetically coherent artworks.

Course Objectives

The course aims to promote a holistic, multidisciplinary, and learner-centric approach to art education. The objectives are to:

- Develop students' creative thinking, visual literacy, and problem-solving abilities through compositional practices.
- Encourage self-expression and articulation of ideas, emotions, and experiences using visual language.
- Promote cultural awareness by integrating traditional, indigenous, and contemporary visual sensibilities.
- Enable students to connect art practice with social, environmental, and ethical concerns.
- Support experiential learning, originality, and the development of an individual artistic voice.

Course Content

Unit I: Theme-Based Composition

- Social and cultural themes
- Contemporary life and human experiences

Unit II: Conceptual and Visual Understanding in Composition

Students will learn the application of the following concepts:

- Foreground, middle ground, and background
- Linear and atmospheric perspective
- Colour harmony and colour symbolism
- Light and shade in composition

Medium and Materials

Students may use any of the following media:

- Watercolour, Poster colour, Acrylic colour, Oil colour

Support materials: Pencil, charcoal, ink, brushes, paper or canvas..

Learning Outcomes

After completion of the course, the student will be able to:

- Create well-organized compositions with conceptual depth.
- Apply principles of design effectively.
- Develop personal expression and visual narration.
- Relate traditional compositional knowledge to contemporary themes.

Scheme of Examination (Practical)

- Emphasis on concept, composition, drawing, colour application, and overall aesthetic quality.

Submission of Artworks (40 Marks)

- Submission marks will be awarded based on the work completed during the session.
- A **minimum of six (6) artworks** (Size: **15 inches × 22 inches**), along with a **sketchbook**, must be submitted.
- The submitted works should be thematically and conceptually related to the course content.
- Submission marks will be awarded jointly by the **Internal and External Examiners**.
- In case of a difference of opinion, each examiner may evaluate separately, awarding marks out of **50% of the total submission marks**.

NOTE :
As this paper is a 4 credit practical course, minimum of 8 hours' teaching per week shall be assigned to the subject.

Semester VI

Paper Code : BAFA- MAJ 602

Paper : Life Study (Full Figure), Practical

Credits: 04

Total Marks: 100

Course Description

Life Study (Full Figure) is a core practical paper designed to develop students' understanding of the human figure through direct observation. The course emphasizes anatomical accuracy, proportion, posture, movement, and expressive quality through both **drawing and painterly approaches**, enabling students to translate visual perception into structured, expressive, and meaningful artistic representations.

Course Objectives

The course aims to promote a holistic, skill-based, and learner-centric approach to art education. The objectives are to:

- Develop observational skills through direct study of the human figure.
- Enhance understanding of human anatomy, proportion, and structural relationships.
- Train students to capture gesture, posture, balance, and movement.
- Encourage sensitivity towards expressive, emotional, and aesthetic aspects of the human form.
- Promote experiential learning and the development of an individual visual language in both drawing and painting.

Course Content

Through this course, students will develop an understanding of the following aspects of Life Study:

Fundamentals of Life Study

- Importance of life study in visual art
- Proportion and measurement of the human figure
- Line quality, contour, and mass drawing

Anatomy and Structure

- Basic skeletal structure
- Muscular system relevant to surface form
- Anatomical basis of posture and movement

Posture, Gesture, and Movement

- Standing, sitting, and reclining poses

- Gesture and action studies
- Balance and weight distribution

Light, Shade, and Form

- Tonal values and modelling of form
- Light source and shadow
- Volume, depth, and three-dimensionality in drawing and painting

Expressive and Contemporary Approaches

- Expressive figure studies
- Painterly interpretation of the human figure
- Development of personal style through life study

Medium and Materials

Students may use any of the following media:

- Pencil (graphite)
- Charcoal
- Conte crayon
- Ink
- Watercolour
- Poster colour
- Acrylic colour
- Oil colour

Support materials: Drawing sheets, oil sketching paper, cartridge paper, newsprint, erasers, fixative, drawing board, easel (if required).

Learning Outcomes

After completion of the course, the student will be able to:

- Render the full human figure with correct proportion, structure, and balance.
- Apply anatomical knowledge in both linear and tonal/painterly studies.
- Use line, tone, colour, and light–shade effectively to suggest form and expression.
- Demonstrate confidence in observational drawing, painting, and visual analysis.

Scheme of Examination (Practical)

Component	**Maximum Marks**	**Duration**
1. Life Study (Full Figure)	60	5 Hours
2. Submission Works	40	Session Work
Total	**100**	

Examination Details

Life Study -Full Figure (60 Marks)

- One full-figure study executed through **drawing or painting**, based on direct observation of a **live model or plaster cast**.
- Emphasis on proportion, anatomy, posture, movement, tonal/colour values, and overall visual impact.

Submission of Artworks (40 Marks)

- Marks will be awarded based on work completed during the academic session.
- A minimum of **four (4) full-figure studies** (drawing and/or painting), along with a **sketchbook**, must be submitted.
- Submission marks will be awarded jointly by the **Internal and External Examiners**.
- In case of difference of opinion, examiners may assess independently, each awarding marks out of **50% of the total submission marks**.

NOTE :
As this paper is a 4 credit practical course, minimum of 8 hours' teaching per week shall be assigned to the subject.

Semester VI

Paper Code: BAFA- MAJ 603

Paper: Portrait Study (Practical)

Credits : 4

Marks: 100

Objectives :

11. **Understanding Human Proportions** – Helps students grasp the accurate proportions and anatomy of the human face.
12. **Developing Observational Skills** – Enhances their ability to notice details like facial expressions, features, and lighting effects.
13. **Mastering Techniques & Mediums** – Allows students to explore different artistic techniques such as shading, blending, and texturing using various mediums (pencil, charcoal, paint, etc.).
14. **Expressing Identity & Emotion** – Encourages students to capture emotions, personality, and identity through facial expressions in their artwork.
15. **Building Confidence in Artistic Skills** – Strengthens technical skills that are foundational for careers in fine arts, illustration, and digital art.

Course Content

Through this course, students will develop an understanding of the following aspects of Portrait Study:

Fundamentals of Portrait Study

- Importance of portrait study in visual art
- Proportion and measurement of facial features
- Line quality, contour, and mass drawing

Paper: Landscape (Practical)

Credits: 4

Marks: 100

Course Description

Landscape Study is a core practical paper designed to develop students' understanding of the natural environment through direct observation. The course emphasizes composition, perspective, light, color, and atmospheric effects, enabling students to translate visual perception into structured, expressive, and meaningful artistic representations.

Course Objectives

The course aims to promote a holistic, skill-based, and learner-centric approach to art education. The objectives are to:

- Develop observational skills through direct study of the natural environment.
- Enhance understanding of composition, perspective, and spatial relationships in landscape.
- Train students to capture light, color, and atmospheric effects.
- Encourage sensitivity towards expressive, emotional, and aesthetic aspects of landscape.
- Promote experiential learning and the development of an individual visual language in both drawing and painting.

Course Content

Through this course, students will develop an understanding of the following aspects of Landscape Study:

- **Fundamentals of Landscape Study**
  - Importance of landscape study in visual art
  - Composition and arrangement of elements
  - Line quality, texture, and mass drawing
- **Space and Perspective**
  - Linear and aerial perspective
  - Foreground, middle distance, and background relationships
  - Depth and distance in landscape
- **Light, Colour, and Atmosphere**
  - Tonal values and colour relationships
  - Light source and shadow
  - Atmospheric effects and mood
- **Expressive and Contemporary Approaches**
  - Expressive landscape studies

- Painterly interpretation of the landscape
- Development of personal style through landscape study

Medium and Materials

Students may use any of the following media:

- Oil colours
- Watercolours
- Acrylic colours
- Pastel colours

Support materials: Canvas, drawing sheets, oil sketching paper, cartridge paper, newsprint, erasers, fixative, drawing board, easel (if required).

Learning Outcomes

After completion of the course, the student will be able to:

- Render a landscape with effective composition and perspective.
- Apply knowledge of light, colour, and atmosphere in landscape studies.
- Use line, tone, colour, and texture effectively to suggest depth and distance.
- Demonstrate confidence in observational drawing, painting, and visual analysis.

NOTES: Single Major, Single/Double Minor BA, BA Honours and BA Honours with Research

1. In the first semester students will be offered three different subjects A, B&C.
2. At the end of second semester each student may choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at end of the second semester.
3. The student opting for Single Major must secure 50% Credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain at least 12 credits in that subject(s).
4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.A. HONOURS with research on the condition that the Institution is either a PU approved Research Centre or already offering master programme in the subject.
5. Once Major and Minor papers are chosen in 3rd Semester, the same will continue as Major and Minor subject in the sub sequent semesters.
6. 'RM' represents Research Methodology
7. The candidate opting for Honours in research is required to study two papers of Research Methodology (RM) of 04 credits each and write a Dissertation of 08 credits in the Major subject.
8. The Dissertation (P2) opted by the candidates pursuing B.A.(Hons.) with Research: The dissertation submitted to the Department/College/Institution, before a pre-fixed date announced by the Department/College/Institution, shall be evaluated by two subject experts. The supervisor shall be one of these two experts. The second expert for an affiliated College/Institution shall be an external examiner either from university campus or from another affiliated college/institution of Panjab University, Chandigarh. The external expert appointed from an affiliated College/Institution shall also be an approved Ph.D. supervisor of Panjab University, Chandigarh. However, for a department on campus offering these programs, the external expert shall be appointed from an institution beyond the administrative jurisdiction of Panjab University, Chandigarh (i.e., expert from another university or research institute not affiliated with the Panjab University).

   The open viva-voce shall be conducted by the external expert in the mandatory presence of the supervisor. Marks out of 200 shall be awarded by the external expert only. The bifurcation of 200 marks shall be as follows:

   i. Marks out of 150 shall be awarded for the quality of dissertation work; and

   ii. Marks out of 50 shall be awarded on the basis of candidate's performance in viva-voce. COURSE TITLE: MAP PROJECTIONS (Theory & Practical)

Course Code : **GEOG-DSC-10 (MAJ-5)-502**
Level of Course : **L-300**
Total Credits : **4 (Theory 2+ Tutorial 1+ Practical 1)**
Maximum Marks : **100 (60 Theory + 10 Internal Assessment+ 30 Practical)**
Course Duration : **Total= 75 hours (Lectures- 30 Hours; Tutorial- 15 Hours; Practical-30 Hours)**

Evaluation: Maximum Marks: **100 (60 Theory + 30 Practical+ 10 Internal Assessment)**

- Terminal Examination : 60 Marks
- Internal Assessment : 10 Marks
- Practical Examination : 30 Marks
- Examination Time : 3 Hours

COURSE OBJECTIVE: The course intends to introduce the concept of map projections and their relevance in Cartography. The course is further designed to explain the types, uses, limitations and construction of map projections.

LEARNING OUTCOME: After the completion of this course, students should be able to

- Understand the usage and significance of map projections
- Understand various types of projection their relevance
- Apply cartographic knowledge to design, produce and interpret projections

PEDAGOGY: The introduction of conceptual and practical foundations of map projections and construction shall form the core of teaching and learning. The students are to be encouraged to actively interact with the teacher and the peer group on themes related to map projections.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part shall carry 2 marks (Total 10x2= 20 marks).
2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. The candidates will attempt *four* questions selecting one from each unit and each question will carry 10 marks (Total 4x10= 40 marks). These will be in addition to the compulsory question at S. No. 1.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
5. For CDOE, reappear/ improvement candidates(s) who have not been assessed earlier for Internal Assessment, the marks secured in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. Paper setter must put note (5) in the question paper.

INSTRUCTIONS FOR PRACTICAL EXAMINATIONS:

1. Each student shall prepare a practical file. They will berequired to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of theirexamination.
2. The practical examination in the form of viva-voce only shall be conducted at the respective college itself except for CDOE. There will be no laboratory exercise at that time of examination.
3. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the

respective colleges in consultation with the senior most teacher of Geography in the college.

4. For students of CDOE, there will be no viva-voce examination for the candidates. They will be required to submit their Practical Note Book (Practical files) with the Centre for Distance and Online Education (CDOE), Panjab University (Department of Geography) at least 10 days before the commencement of their examination. Their Practical files will be evaluated by two examiners (including at least one from the CDOE.
5. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.
6. For practical classes, the number of students in one group shall not exceed fifteen.
7. There will be 2 hours of teaching per week for this paper.

COURSE CONTENT

Unit I: ***Concept of Map Projections***

1. Map Projection: Introduction, Need and Elements
2. Map projections: Classification; Principles of identification and choice of projection

Unit II: ***Properties and Limitations of Cylindrical Projection***

3. Simple Cylindrical Projection
4. Equal area, and Mercator Projection

Unit III: ***Properties and Limitations of Conical Projection***

5. One Standard Parallel
6. Bonne's, and Polyconic Projection

Unit IV: ***Properties and Limitations of Zenithal Projection***

7. Gnomonic, Stereographic, Orthographic
8. Equidistant and Equal Area

PRACTICAL EXERCISES

1. Construction of Simple Cylindrical and Mercator Projection
2. Construction of Conical Projection-One Standard Parallel
3. Construction of Bonne's Projection and Polyconic Projection
4. Construction of Gnomonic and Stereographic Projection
5. Construction of Orthographic Projections
6. Construction of Sinusoidal and Mollweide's projections

- Internal Assessment : 10 Marks
- Practical Examination : 30 Marks
- Examination Time : 3 Hours

COURSE OBJECTIVES: This course aims to impart scientific knowledge on surveying techniques to enhance practical understanding of conducting ground surveys using various methods.

LEARNING OUTCOME: After the completion of this course, students should be able to

- Outline basic concepts of surveying
- Apply various tools and techniques of surveying
- Create maps using chain & Tape, plain table, and prismatic compass methods

PEDAGOGY:A conscious effort shall be made to make the students understand surveys through learning by doing approach. They will be encouraged to undertake survey using various techniques and create maps of surveyed areas. The learning shall be based on creative assignments, interactive & innovative activities, discussions and learning activities.

COURSE CONTENT

Unit I: ***Introduction to surveying***

1. Concepts of Surveying, Geography and Surveying
2. Importance and Necessity of Surveying
3. Classification of Surveying: Based on Purpose, Instruments and Methods

Unit II: Chain and Tape Survey Method

4. Instruments Used in Chain and Tape Survey
5. Methods of Chain and Tape Survey
6. Obstacles, Errors, Merits and Demerits

Unit III: Plain Table Survey Method

7. Instruments and Procedure of Plane Table Survey
8. Methods of Plane Table Survey
9. Sources of Errors, Merits and Demerits

Unit IV: Prismatic Compass Survey

10. Instrument: Prismatic Compass, its parts and their functions
11. Principles and Procedure of Prismatic Compass Survey
12. Methods of Prismatic Compass Survey, Sources of Errors, Merits and Demerits

PRACTICAL EXERCISES

1. Surveying and Mapping Using Chain and Tape
2. Plain Table Survey: Radiation Method
3. Plain Table Survey: Intersection Method
4. Plain Table Survey: Traverse Method
5. Prismatic Compass Method: Radial Line Method
6. Prismatic Compass Method: Intersection Method

COURSE TITLE:GEOGRAPHY OF AFRICA

Course Code : **GEOG-DSC-12 (MAJ-5)-504**
Level of Course : **L-300**
Total Credits : **4 (Theory 3+ Tutorial 1)**
Maximum Marks : **100 (90 Theory + 10 Internal Assessment)**
Course Duration : **Total= 60 hours (Lectures- 45 Hours; Tutorial- 15 Hours)**

Evaluation: Maximum Marks: **100 (90 Theory + 10 Internal Assessment)**

- ❖ Terminal Examination : 90 Marks
- ❖ Internal Assessment : 10 Marks
- ❖ Examination Time : 3 Hours

COURSE OBJECTIVE: To understand the physical and cultural landscape of Africa, its human resources, and distributional patters of agricultural, mineral and power resources and industries.

LEARNIG OUTCOME: After the completion of this course, students should be able to

- ❖ Comprehend the nature, scope and significance of Geography of Africa
- ❖ Read, analyse and critique geographical aspects of Africa.
- ❖ Demonstrate knowledge to interpret Africa's physical and cultural landscape

PEDAGOGY: Use of visual aids is essential for showing and explaining maps in the classroom teaching. Students will be encouraged to use an Atlas, Audio- video aids, and class discussion to examine and critique different aspects of Geography of Africa.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 12 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 9 parts in about 25-30 words each. Each part shall carry 2 marks (Total 9x2= 18 marks).
2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. The candidates will attempt *four* questions selecting one from each unit and each question will carry 18 marks (Total 4x18= 72 marks). These will be in addition to the compulsory question at S. No. 1
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.

COURSE CONTENT

UNIT-I

1. **Introduction:** Africa in the context of the World.
2. **Physical aspects of Africa:** Relief, Drainage, Climate, Soils and Vegetation.

UNIT-II

3. **Human Resources:** Population- its determinants, distribution and density, Growth
4. Sex Ratio, Literacy, Migration and Urbanization.

UNIT-III

5. **Agriculture:** Agriculture, its determinants, characteristics and problems.
6. **Major Crops:** Wheat, Rice, Maize, Cotton, and Coffee.
7. Livestock and Dairy Farming.

UNIT-IV

8. **Minerals Resources:** Gold and Diamonds, Iron Ore, Copper and Aluminium.
9. **Power Resources:** Coal, Petroleum, Hydroelectricity.
10. **Major Industries:** Factors affecting industries, Iron and Steel, Automobile, and Cotton.

SEMESTER VI

COURSE TITLE: GEOGRAPHY OF MIDDLEEAST

Course Code : **GEOG-DSC-14 (MAJ-6/MIN-6)-601**
Level of Course : **L-300**
Total Credits : **4 (Theory 3+ Tutorial 1)**
Maximum Marks : **100 (90 Theory + 10 Internal Assessment)**
Course Duration : **Total= 60 hours (Lectures- 45 Hours; Tutorial- 15 Hours)**

Evaluation: Maximum Marks : **100 (90 Theory + 10 Internal Assessment)**

- Terminal Examination : 90 Marks
- Internal Assessment : 10 Marks
- Examination Time : 3 Hours

COURSE OBJECTIVE: The course intends to provide an understanding of the Middle East region with respect to Land, People, Polity and Economy; the physical and human resource and its interface with economic development; conflicts, prospects and issues related to regional groupings.

LEARNING OUTCOME: At the end of the course the students will be able to

- Outline the history and unique geographic personality of Middle East.
- Explain the physical and cultural features of Middle East region.
- Analyse and evaluate conflicts, problems and prospects of Middle East.

PEDAGOGY: Teacher shall make efforts to instruct students to make stencils/maps of the Middle East. Students should be encouraged to use atlas and online maps in classrooms. Open Education Resources may be used for teaching and discussions. The students shall be asked to undertake creative assignments on different topics of the Middle East Region to enhance their learning and practical knowledge.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 12 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 9 parts in about 25-30 words each. Each part shall carry 2 marks (Total 9x2= 18 marks).
2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. 5. For CDOE, reappear/improvement candidates(s), who have not been assessed earlier for internal assessment, the marks secured in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. The paper setter must put note (5) in the question paper.

COURSE CONTENT

Unit-I: Historical Importance and Geographic Personality of Middle East Region

1. History of Middle East; Location, Situation, Size and Constituent countries
2. Regional Grouping and Sub-grouping of Middle East countries

Unit-II: Physical Geography of Middle East Region

3. Physical Features: Relief, Drainage, Soils and Vegetation
4. Climate: Temperature, Rainfall and Climatic Regions
5. Natural Resources: Mineral and Power

Unit-III: Human Geography of Middle East Region

6. Demography: Distribution, Density, Growth and Urbanization
7. Religion and Languages: Religious Significance, Linguistic Diversity
8. Economic Activities: Agriculture, Industries, Trade and Transport

Unit-IV: Conflicts, Organization, Problems and Prospects of Middle East Region

Conflicts: Arab-Israeli War, Iran-Iraq War, Persian Gulf War and Yemini Civil War

9. Organizations: Arab League, GCC and OPEC;
10. Problems and Prospects of Middle East region

- Terminal Examination : 60 Marks
- Internal Assessment : 10 Marks
- Practical Examination : 30 Marks
- Examination Time : 3 Hours

COURSE OBJECTIVE: This course aims to introduce basic statistical techniques in geography and impart applied knowledge on computational procedures, usage and application of various statistical techniques.

LEARNING OUTCOME: After the completion of this course, students should be able to

- Outline the sources of data, basic of tabulations and data classification.
- Learn measures of central tendency and their uses.
- Compute and apply measures of dispersion, correlation and use of these measures.

PEDAGOGY:A conscious effort shall be made to make the students understand statistics through learning by doing approach. Students will be encouraged to undertake practical exercises based on various statistical methods to analyse the datasets and derive meaningful information.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part shall carry 2 marks (Total 10x2= 20 marks).

5. For CDOE, reappear/ improvement candidates(s) who have not been assessed earlier for Internal Assessment, the marks secured in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. Paper setter must put note (5) in the question paper.

INSTRUCTIONS FOR PRACTICAL EXAMINATIONS:

1. Each student shall prepare a practical file. They will berequired to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of theirexamination.
2. The practical examination in the form of viva-voce only shall be conducted at the respective college itself except for CDOE. There will be no laboratory exercise at that time of examination.
3. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the

respective colleges in consultation with the senior most teacher of Geography in the college.

4. For students of CDOE, there will be no viva-voce examination for the candidates. They will be required to submit their Practical Note Book (Practical files) with the Centre for Distance and Online Education (CDOE), Panjab University (Department of Geography) at least 10 days before the commencement of their examination. Their Practical files will be evaluated by two examiners (including at least one from the CDOE.
5. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.
6. For practical classes, the number of students in one group shall not exceed fifteen.
7. There will be 2 hours of teaching per week for this paper.

COURSE CONTENT

Unit I: Introduction, Sources of Data and Frequency Distribution

1. Statistical methods in geography: definition, types and significance;
2. Tabulation and Classification of Data; Frequency Distribution, Histogram,
3. Frequency Polygon and Ogive Curve.

Unit II: Measures of Central Tendency

4. Mean: Concept, Characteristics and Measures
5. Median: Concept, Characteristics and Measures
6. Mode: Concept, Characteristics and Measures

Unit III: Measures of dispersion

7. Concept, Characteristics and Measures of Range and Quartiles
8. Concept, Characteristics and Measures of Mean Deviation
9. Concept, Characteristics and Measures of Standard Deviation and CV.

Unit IV: Correlation

10. Concept and Characteristics of Scatter Diagram
11. Karl Pearson’s Coefficient of Corelation
12. Spearman’s rank correlation coefficient.

PRACTICAL EXERCISES

1. Preparation of Frequency Distribution and Histogram,
2. Preparation of Frequency Polygon and Ogive Curve.
3. Mean, Median and Mode
4. Range, Quartiles
5. Standard Deviation and CV.
6. Establishing Corelation using Scatterplot/Scatter Diagram
7. Karl Pearson coefficient of Corelation
8. Spearman’s rank correlation coefficient.

Pedagogy of the Course Work:
Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

Instructions for paper-setters and candidates:
• The maximum marks for the course will be 100.
• **Theory Exam: 67 marks**
Time allowed: 03 hours
There shall be 7 questions in all. The first question is compulsory comprising 12 short answer type questions spread over the whole syllabus. The candidates are required to attempt 7 questions in about 50 words each. Each question shall be of 1 mark. (1 x 7 = 7 marks). Rest of the paper shall comprise of three units with two questions in each. The candidates shall attempt one question from each unit. Each question will carry 20 marks. (3 X 20 = 60 marks)
• **Internal Assessment: 8 marks**
Mid-semesters: 5 marks, Class Participation- 1
Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:
Unit I

- Television as a medium; brief history and growth in India
- Introduction to OTT: meaning, history, and growth in India
- Television vs. OTT platforms: key differences and audience patterns
- Types of TV programmes; Types of OTT content: web series, short films, docu-series, etc.

Unit II

- Content models: TV (broadcast) and OTT (SVOD, AVOD)

- Storytelling style: TV = episodic and schedule-based and OTT = binge-watching and cinematic
- Production workflow differences: TV = fast, multi-camera and OTT = planned, film-style

Unit III

- Pre-Production: Idea development, Scriptwriting (TV scripts, web scripts), Storyboarding
- Production: Types of cameras: DSLR, camcorder, studio cameras (basic overview), Camera handling techniques, Camera angles and shots, Camera movements, Camera transitions; Basics of lighting: spot, broad, flood, soft light, dimmer; Basics of sound: microphones, ambience, dialogue clarity
- Post-Production: - Basics of video editing techniques; Linear vs. non-linear editing (intro); Basic colour correction, audio balancing

Practical: 25 Marks

1. Record various camera shots and movements – 10 marks
2. Compare one TV show and one OTT web series and write a comparative analysis based on audience type, storytelling style and production differences - 15 marks

Suggested Readings

Course Title: Introduction to Advertising and PR
Course Code: JSM-DSC-13-(MAJ)-505
Course Level: 300
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objective:
To provide students with a foundational understanding of advertising and public relations by exploring their principles, tools, structures, and ethical frameworks, enabling them to analyse and create basic communication content across media platforms.

Learning Outcomes:
After successful completion of this course, the student should be able to:
1. Distinguish between advertising and public relations, identify types of advertising, apply basic copywriting principles and recognize key PR tools used in both traditional and digital contexts.
2. Describe the structure and functions of advertising and PR agencies, outline the PR process and apply ethical guidelines while planning or evaluating communication activities.

Pedagogy of the Course Work:
Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

• **Internal Assessment: 8 marks**
Mid-semesters: 5 marks, Class Participation- 1
Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:
Unit I

- Similarities and differences between Advertising and Public Relations
- Classification of advertising: Media based , purpose base , demand based, area based, content based, lifecycle based classification
- Basic principles of writing advertising copy, advertising appeals

Unit II

- PR Tools in the digital age
- Public Relations in Govt. Public & Private Sector
- Brief intro to the PR process

Unit III

- Structure and functions of an advertising agency

- Structure and functions of PR agency
- Ethical guidelines related to advertising and public relations

Practical: 25 Marks

1. Identify PR tools used in a digital campaign – 15 marks
2. Design two Public Service Advertisements – 10 marks

SEMESTER VI

Course Title: Basics of Photography
Course Code: JSM-DSC-14-(MAJ/MIN)-601
Course Level: 300
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objective:

To introduce students to the fundamental principles, techniques, and ethical practices of photography, enabling them to understand camera functions, apply essential compositional and lighting skills, and develop basic proficiency in photo editing.

Learning Outcomes:
After successful completion of this course, the student should be able to:

1. Operate cameras and use compositional and lighting techniques to produce well-structured photographs
2. Perform basic photo editing using industry-standard tools and demonstrate an understanding of ethical considerations

Pedagogy of the Course Work:
Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.
Instructions for paper-setters and candidates:

• **Internal Assessment: 8 marks**
Mid-semesters: 5 marks, Class Participation- 1
Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:
Unit I

- Understanding the camera: DSLR, smartphone cameras
- Camera anatomy and exposure: body, sensor, lens, viewfinder, exposure triangle: aperture, shutter speed, ISO; Types of lenses

Unit II

- Basics of portrait, landscape, and street photography
- Basics of composition: rule of thirds, framing, leading lines, symmetry
- White balance and colour temperature; Natural vs artificial light

Unit III

- Basics of photo editing: brightness, contrast, saturation, colour correction
- Introduction to editing softwares: Lightroom, Photoshop, Snapseed
- Ethical considerations in photography

Practical: 25 Marks

1. Click photographs to demonstrate the rules of composition. - 10 marks
2. Edit five photographs using a photo editing tool - 15 marks

Course Title: Intercultural Communication

Course Code: JSM-DSC-15-(MAJ)-602
Course Level: 300
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objective:

To introduce students to the foundational concepts, processes and challenges of intercultural communication, enabling them to understand cultural differences, negotiate meaning across cultures, and develop skills for effective communication in diverse social, global and digital contexts.

Learning Outcomes:

1. Explain key concepts of culture and intercultural communication and analysehow cultural identities, values and contexts influence communication processes.
2. Demonstrate intercultural competence by applying empathy, sensitivity and adaptive communication strategies to navigate cultural differences and resolve intercultural conflicts.

Pedagogy of the Course Work:

Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

Instructions for paper-setters and candidates:

• Internal Assessment: 8 marks
Mid-semesters: 5 marks, Class Participation- 1
Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:
Unit I
- Meaning and characteristics of culture; Relationship between culture and communication
- Types of culture (high, low, popular, folk)
- Cultural identity, belonging and co-cultures

Unit II
- Meaning and scope of intercultural communication
- Intercultural contexts and cultural adaptation
- Communicating identity in intercultural settings

Unit III
- Developing intercultural competence (empathy, sensitivity, adjustment)
- Stereotypes and intercultural conflict
- Intercultural communication in global and digital spaces

Practical: 25 Marks
1. Analyse verbal and nonverbal behaviours in a real or recorded intercultural interaction to understand communication patterns.- 10 marks
2. Study media content (film/OTT content/ads/songs/TV Soaps to identify cultural representations, stereotypes and their impact on audience perceptions- 15 marks

Course Title: Computer Mediated Communication
Course Code: JSM-DSC-16-(MAJ)-603
Course Level: 300
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objective:
To enable students to understand, analyse and critically evaluate how computer-mediated communication shapes interpersonal, social and media practices by examining its core concepts, theories, technologies and contemporary challenges.

Learning Outcomes:
After successful completion of this course, the student should be able to:

1. Explain key concepts, characteristics and theories of computer-mediated communication and critically analyze how different digital platforms influence communication patterns and media practices
2. Evaluate and apply CMC principles to real-world communication contexts

Pedagogy of the Course Work:
Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:
Unit I

- Definition and scope of Computer Mediated Communication
- Text-based, audio-visual, multimodal communication
- Characteristics of CMC: synchronicity, anonymity, interactivity, persistence

Unit II

- Theories of CMC: Social Presence, Media Richness, Social Information Processing
- Types of CMC: email, messaging apps, social networks, online forums, podcasting, blogging, microblogging and vlogging
- Impact of CMC on journalism: audience engagement, news sharing, algorithmic distribution

Unit III

- Digital self and online identity, psychology of selective self-presentation
- CMC in interpersonal and group communication: relationship formation, maintenance
- Online privacy, Online addiction, online aggression, misinformation, virality

Practical: 25 Marks

1. Join any one moderated online community and prepare a report on the communication community norms and moderation style and types of interactions. - 10 marks
2. Create promotional messages for a college event for three online platforms. - 15 marks

Course Level: 300
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objective:

To equip students with the critical skills to access, analyse, evaluate, create and act upon media messages across digital and traditional platforms, fostering informed, responsible and ethical media engagement.

Learning Outcomes:

After successful completion of this course, the student should be able to:
1. Identify and explain key media literacy concepts, including types of media literacy, representation, participatory culture and online safety.
2. Apply basic media literacy skills such as spotting fake news, understanding algorithms and using simple verification tools.

Pedagogy of the Course Work:

Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67

marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

Instructions for paper-setters and candidates:

• The maximum marks for the course will be 100.

• Internal Assessment: 8 marks

Mid-semesters: 5 marks, Class Participation- 1

Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:

Unit I

- Meaning and scope of media literacy
- Media literacy, democracy and freedom of expression
- Types of media literacy – News literacy, Digital literacy, Cinema literacy, Games literacy, TV literacy and Ad literacy

Unit II

- Democratisartion of information, participatory culture and user-generated content
- Algorithms, echo chambers and digital surveillance
- Media bias and representation: gender, class and cultural identity

Unit III

- Fake news, privacy and online safety
- Fact-checking and verification tools, AI-Based Detection
- Reverse Image search, Metadata Analysis, Lateral Reading

Practical: 25 Marks

1. Create a short video to educate your peers on any aspect of online safety-10 marks
2. Survey news content on any social medium and use a fact checking tool to check its credibility- 15 marks

Course Level: 300
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objective:
To provide students with a comprehensive understanding of research concepts, designs, and methodologies, enabling them to formulate research problems, apply appropriate qualitative and quantitative methods, and interpret data systematically in academic and professional contexts.

Learning Outcomes:
After successful completion of this course, the student should be able to:

1. Identify, explain and apply key components of the research process
2. Collect, analyse and interpret data using basic qualitative and quantitative techniques

Pedagogy of the Course Work:
Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

Course Contents:

Unit I

- Meaning and concept of research: Ways of knowing
- Types of Research: pure & applied, exploratory, descriptive, historical, experimental, action, case study
- Elements of research: variables, hypothesis, induction, deduction, theoretical
- Qualitative and quantitative approaches (overview)

Unit II

- Research Design: Overview
- Research problem: conceptualization, definition and formulation, research questions and problem statements
- Hypothesis and types
- Review of Literature

Unit III

- Quantitative and qualitative research methods
- Sampling Design and techniques
- Data collection tools: questionnaires, interviews, FGDs, observation, case study, content analysis
- Basic data analysis and interpretation; Introduction to SPSS and non-statistical analysis
- Referencing and citation styles (MLA, APA)

Practical: 25 Marks
Identify a media research problem, design a brief proposal and conduct a small survey or content analysis with basic data tabulation and interpretation.

Notes.
1. Members of the Board of Studies unanimously decided not to offer mathematics in Table-3 of Arts stream.
2. Practicals (wherever included in the syllabi) may be conducted into small groups (say 15 – 20 students) to facilitate the smooth conduct of practical sessions.
3. Scientific Calculator is allowed in the Numerical Analysis Paper.
IMPORTANT NOTE: All papers in VAC / SEC / MDC would be floated in each of the first three semesters. However, the students are not allowed to repeat any paper.

Semester – V

*MAT-DSC5 (MAJ/MIN)-501: LINEAR ALGEBRA

Credits = 4
Teaching hours = 6 hrs / week including tutorials / practicals etc. in a semester of 15 weeks.
Exam Time: 3 hours
Max. Marks: 100 (External: 80 + Internal Assessment: 20)

Note:

1. The syllabus has been split into Four Units. The examiner will set in total nine questions including a compulsory question. The compulsory question (QuestionNo.1) will contain 4 parts covering the entire syllabus. Two questions will be set from each Unit.
2. A student will be required to attempt five questions in all, selecting one question from each Unit and the compulsory question. Each question will carry equal marks.
3. The 20 marks of internal assessment has following division

   Mid Semester Exam = 10 marks,
   Assignment / Project work = 5 marks,
   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective. This syllabus aims to introduce students to the foundational concepts and structures of linear algebra, with a focus on vector spaces, linear transformations, matrices, and inner product spaces. The course is designed to equip students with the theoretical understanding and practical skills necessary to apply these concepts in various mathematical fields.

Learning Outcomes:

1. Understand and apply the concepts of vector spaces, subspaces, and their properties, including basis, dimension, and direct sums.
2. Analyze and solve problems related to linear transformations, including the use of the Rank-Nullity theorem and invertible transformations.
3. Use matrix representations to solve problems involving linear transformations, characteristic roots, and change of basis.
4. Apply advanced techniques like the Cayley-Hamilton theorem, orthogonal projections, and the Gram-Schmidt process to diagonalize matrices and work with inner product spaces.

Unit-I

Definition of a Group, Ring, Field and examples. Definition and Examples of Vector Spaces, Subspaces, Algebra of subspaces, Linear span, Linear dependence and independence of vectors, Basis and dimension of a vector space and its subspaces. Direct sums and complements.

Unit-II

Linear transformations, kernel and range of linear transformation Rank and Nullity of a linear transformation, Rank-Nullity theorem, invariant sub space, Vector space of linear transformations, invertible linear transformations.

Unit-III

Linear transformations and matrices, Matrix representation of a linear transformation relative to an ordered basis. Matrix of an inverse operator, Change of basis. Characteristic roots and characteristic vectors, Algebraic and Geometric multiplicity of characteristic roots.

Unit-IV

Cayley-Hamilton theorem, Diagonalizable operators and matrices. Minimal polynomial of a linear operator (matrix). Inner product and inner product spaces, Orthogonal sets, Orthogonal projections, The Gram Schmidt process.

* MAT-DSC5 (MAJ)-502: SEQUENCE AND SERIES OF REAL NUMBERS

Credits = 4
Teaching hours = 6 hrs / week including tutorials /practicals etc. in a semester of 15 weeks.
Exam Time: 3 hours
Max. Marks: 100 (External: 80 + Internal Assessment: 20)

Note:

1. The syllabus has been split into Four Units. The examiner will set in total nine questions including a compulsory question. The compulsory question (QuestionNo.1) will contain 4 parts covering the entire syllabus. Two questions will be set from each Unit.
2. A student will be required to attempt five questions in all, selecting one question from each Unit and the compulsory question. Each question will carry equal marks.
3. The 20 marks of internal assessment has following division

   Mid Semester Exam = 10 marks,
   Assignment / Project work = 5 marks,
   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to develop a comprehensive understanding of sequences and series, emphasizing their convergence properties and criteria. Students will learn to analyze and test the convergence of sequences and series using various methods, including Cauchy's Criterion, Condensation Test, Integral Test, and Root Test etc. The course will also cover practical applications of convergence, preparing students for advanced mathematical studies and research.

Learning Outcomes: By the end of this course, students will be able to:

1. Understand the fundamental properties of Sequences and Series
2. Analyze convergence of sequences and series by using established tests including Cauchy's Condensation Test, Integral Test, and Root Test, to determine the behavior of series.
3. Develop skills for advanced mathematical proofs and Problem-Solving

Unit-I

Definition of a real sequence, Bounds of a sequence, Convergent, Divergent and Oscillatory sequences. Limit of a sequence, Algebra of limits, sandwich theorem or squeeze principal, application of squeeze principal, Monotonic Sequences, Theorems on monotonic sequences, applications of monotonic sequence in numerical questions, Cauchy's theorems on limits. Cauchy's first theorem on limits, Cauchy's seconds theorem on limits. Application of Cauchy's theorems on limits.

Unit-II

Subsequences of a real sequence, subsequential limit (cluster point), peak point, Bolzano-Weierstrass Theorem, Cauchy's sequence, Cauchy's general principal of convergence. Application of Cauchy's sequence in numerical questions of real sequences.
Sequential continuity and uniform continuity of functions of single real variable. Numerical questions related to sequential continuity and uniform continuity of function.

Unit-III

Infinite Series, convergence of series, convergence of geometric series, Series of non-negative

* For students who follow either template-1 or opted mathematics as a major subject in template-2.

terms. Convergences of series of non-negative terms, P-Test. Comparison tests, Cauchy's Condensation test, Cauchy's Integral test, Cauchy's Root test.

Unit-IV

Ratio tests: Kummer's Test, D'Alembert's test, Raabe's test, De Morgan and Bertrand's test, Gauss Test, Logarithmic test. Alternating series. Leibnitz's theorem. Absolute and conditional convergence, Rearrangement of absolutely convergent series, Riemann's rearrangement theorem.

   Assignment / Project work = 5 marks,
   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective. The objective of this course is to introduce students to special types of differential equations, particularly Bessel and Legendre equations, and solving these using power series methods. The course will explore the properties of these solutions, such as recurrence relations and orthogonality. Additionally, students will learn partial differential equations. An important technique of solving differential equations by using Laplace and Inverse Laplace transformations will be discussed.

Learning Outcomes: By the end of this course, students will be able to:

1. Identify and solve Bessel and Legendre differential equations using power series methods.
2. Analyze the properties of Bessel and Legendre functions, including recurrence relations and orthogonality.
3. Understand the formulation and solution of partial differential equations.
4. Apply Laplace and Inverse Laplace transformations to solve ordinary differential equations.

Unit-I

Series solution of differential equations, Power Series and Frobenius method, Bessel and Legendre equations. Bessel functions of First and Second kind. Legendre function. Generating function. Equation reducible to Bessel's equation and its solution.

Unit-II

Recurrence relation and orthogonality of Bessel and Legendre function. Partial Differential Equations: Origin of first order Partial Differential Equations, Linear Equation of first order, Integral surfaces passing through a given curve, surfaces orthogonal to a given system of surfaces.

* Only for those students who have opted mathematics as major subject in table-1.

Unit-III

Laplace Transformation-Linearity of the Laplace transformation. Existence theorem for Laplace transformations, Shifting Theorems, Laplace transforms of derivatives and integrals, Multiplication of t^n, division by t.

Unit-IV

Inverse Laplace Transforms-Linearity property, shifting properties, Change of Scale Property. Inverse Laplace transforms of derivatives and integrals, Convolution theorem. (without proof) Applications of Laplace Transforms- solution of integral equation, Solution of differential equations with constant coefficients, Solution of differential equations with variable coefficients,

   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The main goal of this course is to deliver basics of the solid geometry. The course introduces the concepts of plane, sphere, cone and cylinder. Methods will be taught to write various kinds of equations of these objects embedded in multiple ways in the 3-dimensional space.

Learning Outcomes:

The students will be able to write equations of plane, sphere, cone, cylinder and conicoids. Students will learn various properties of these objects, their tangents and normals.

Unit-I

Sphere: Section of a sphere and a plane, spheres through a given circle, intersection of a line and a sphere, tangent line, tangent plane, angle of intersection of two spheres and condition of orthogonality, power of a point w.r.t. a sphere, radical axis, radical center, co-axial family of spheres, limiting points.

Unit-II

Transformation of axes: Shifting of origin and rotation of axes.
Cylinder: Cylinder as a surface generated by a line moving parallel to a fixed line and through a fixed curve, different kinds of cylinders such as right circular, elliptic, parabolic and hyperbolic cylinders in standard forms, enveloping cylinders.

Unit-III

Cone: Cone with a vertex at the origin as the graph of a homogeneous equation of second degree in x,y,z, cone as a surface generated by a line passing through a fixed curve and a fixed point outside the plane of the curve, Reciprocal cones, elliptic cones, , enveloping cones.

Unit-IV

* Only for those students who have opted mathematics as major subject in table-1.

Right circular cones, right circular cone as a surface of revolution obtained by rotating the curve in a plane about an axis.
Conicoid: Equations of ellipsoid, hyperboloid and paraboloid in standard form. Reduction of second degree equation inthree variables in standard form.

   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to provide students with a fundamental understanding of forces, their effects on bodies at rest, and the conditions required for equilibrium. Key topics include the Parallelogram Law, the Triangle Law, Lami's Theorem, and Varignon's Theorem, along with the study of moments, couples, and friction.

Learning Outcomes: Upon completion of this course, students will be able to:

1. Apply fundamental laws, such as the Parallelogram and Triangle Laws, to resolve and combine forces acting on a body.
2. Determine the resultant and equilibrium conditions for coplanar forces, including concurrent and non-concurrent force systems.
3. Analyze moments, couples, and use Varignon's Theorem to simplify complex force systems.

Unit-I

Basic notions. Composition and resolution of concurrent forces–Parallelogram law of forces, Components of a force in given directions, Resolved parts of a force, Parallel Forces, resultant of two like (unlike) parallel forces acting at distinct points and its applications.

Unit-II

Resultant of any number of coplanar concurrent forces, Equilibrium conditions for coplanar concurrent forces, equilibrium of a body resting on a smooth inclined plane. Equilibrium of three forces acting at a point – Triangle law of forces, converse of Triangle law of Forces, $\lambda - \mu$ theorem, Lami's theorem.

* Only for those students who have opted mathematics as major subject in table-1.

Unit-III

Moments and Couples – Moment of a force about a point and a line, Centre of Parallel forces, theorems on moment of a couple, Equivalent couples, Varignon's theorem, generalized theorem of moments, resultant of a force and a couple, resolution of a force into a force and a couple, reduction of a system of coplanar forces to a force and a couple.

Unit-IV

Equilibrium conditions for any number of coplanar non-concurrent forces. Friction; definition and nature of friction, laws of friction, equilibrium of a particle on a rough plane, Problems on ladders, rods, spheres and circles.

   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective:The main goal of this course is to deliver basics of plane geometry. The course introduces the concept of pair of straight lines, circles, conic sections, sphere, cone and cylinder. Methods will be taught to write equations of these objects whenever requisite information is given.

Learning Outcomes: Students will be able to write joint equation of a pair of straight lines, equations of circle and other conics, equations of tangents, normal and chord of contact in case of circle and other conics. Equations and various properties of sphere, cone, cylinder and their tangents and normal will be learnt.

.

Unit-I

Change of axes: Translation and rotation of axes.
Pair of Straight lines : Equation of a straight line in polar coordinates, Joint equation of pair of straight lines (Cartesian coordinates), angle between them, Condition of parallelism and perpendicularity.

Circle: General equation of circle, parametric equations, tangents, normals, chord of contact, pair of tangents from a point, equation of chord in terms of mid-point.
Scope. Chapters 3, 4 and 5 of [1].

Unit-II

Conic sections : Equations of parabola, ellipse and hyperbola in Cartesian coordinate system, parametric forms of conics, equations of their tangents, normal, chords of contact, pole and polar, tangents from a point, equation of chord in terms of mid-point, some important results and properties of conics (e.g. see [1]).
Scope. Chapters 7, 8 and 9 of [1].

Unit-III

More on conic section. Polar equation of conic, diameter and conjugate diameters of the conics. Special properties of Parabola, Hyperbola and Ellipse. Conjugate hyperbola, asymptotes to the hyperbola, rectangular hyperbola. Identification of conic in general second degree equations.

Unit-IV

Sphere, Cone, Cylinder. Sphere and its intersections with plane. Polar plane, radical plane, intersection of two spheres. Equation of a cone, intersections of cone with a plane. Enveloping cone, right circular cone. Equation of a cylinder, Enveloping cylinder, right circular cylinder.
Scope. Chapters 15, 16 and 17 of [1].

   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to provide students with a solid foundation in advancedcalculus, focusing on multivariable functions, special functions, integration, and vector calculus. Students will explore key theorems, including Euler's theorem on homogeneous functions, Taylor's theorem for multivariable functions, and the Mean Value Theorems of integral calculus. They will also study improper integrals, convergence tests, and special functions such as Beta and Gamma functions. The course further covers vector differentiation, equipping students with analytical skills applicable to physics, engineering, and advanced mathematics.

Learning Outcomes: Upon successful completion of this course, students will be able to:

1. Apply Euler's and Taylor's theorems to solve mathematical problems.
2. Differentiate between countable and uncountable sets.
3. Determine integrability conditions for functions and apply the fundamental theorem of calculus, mean value theorems, and change of variables in integral calculations.
4. Evaluate improper integrals and analyze their convergence using comparison, Abel's, and Dirichlet's tests.
5. Calculate gradients, divergence, and curl, and apply these concepts in solving problems in vector calculus.

Unit-I

Maxima and minima of functions of two variables, Taylor's theorem for functions of two and three variables. Jacobians. Envelopes. Evolutes. Countable and uncountable sets.

* Not for students who opted mathematics as a minor subject in table-II.

Unit-II

Riemann integral, Integrability of continuous and monotonic functions, Integrability of a function having finite points of discontinuity, Properties of integrable functions. The fundamental theorem of integral calculus, change of variables, Mean value theorems of integral calculus (First Mean Value Theorem, Generalised first Mean Value Theorem , Bonet's Mean value Theorem, Weierstrass' Mean Value Theorem).

Unit-III

Improper integrals and their convergence, Comparison tests, Absolute and conditional convergence, Abel's and Dirichlet's tests. Beta and Gamma functions.

Unit-IV

Frullani's integral, convergences Integral as a function of a parameter. Continuity, derivability and integrability of an integral of a function of a parameter. Vector differentiation, Gradient, Divergence and Curl with their properties and applications.

Objective: This course is application oriented which introduces the concepts of linear programming to the students.

Course outcomes: After the completion of the course, the students will be able to formulate and solve linear programming problems.

UNIT-I

Introduction –General Linear programming problem (LPP) and examples, Formulation of LPP, Standard and canonical form of LPP, Convex set and its properties, Hyperplane, Open and Closed half-spaces, Feasible, Basic Feasible and Optimal Solutions, Extreme Point & graphical methods (Chapter-2, Reference [3])

UNIT-II

Simplex method, Artificial variable techniques- Two Phase Method; Big M Method, Special cases in LPP.
Finding Inverse of a matrix using Simplex method, Solving system of linear equations using Simplex method. (Chapter-3, Reference [3])

UNIT-III

Sensitivity analysis- removal of constraint, change in cost of basic or non-basic variable. Duality: Definition of the dual problem, Primal-dual relationships, Economic Interpretation of Duality, Dual simplex Method. (Chapter-4, Reference [3])

UNIT-IV

LP Formulation of Transportation Problem, Existence of Solution in Transportation Problem. Assignment Problem, Mathematical Formulation of the Problem Test for Optimality by using Hungarian Method – Maximization Case in Assignment Problem

Objective: The objective of this course is to introduce some useful topics, to the students, of probability theory, which will be helpful in solving problems in other areas of mathematics as well as in daily life. Continuous as well as discrete random variables will be studied at length. Many illustrations will be given to convince their applications in mathematics as well as in other areas.

Learning Outcomes: By the end of this course, students will be able to:

1. Compute mean, variance, moment generating functions.
2. Apply Bayes' theorem in computing probabilities.
3. Use random variable in computing probability.

Unit-I

Review of notion of Probability, conditional Probability and independence, Bayes' Theorem. Random variables, probability density function, cumulative distribution function, discrete and continuous random variables, expectations, mean, variance, moment generating function, skewness and kurtosis.

Unit-II

Discrete Random Variables: Bernoulli random variable, binomial random variable, negative binomial random variable, geometric random variable, Poisson random variable.

Unit-III

Continuous Random Variables: Uniform random variable, exponential random variable, Beta random variable, Gamma random variable, Chi-square random variable, normal random variable.

Unit-IV

Bivariate Random Variables: Joint distribution, joint and conditional distributions, Conditional Expectations, Independent random variables, the correlation coefficient, Bivariate normal distribution.

Objective: The objective of teaching Dynamics is to provide students with an understanding of the fundamental principles governing the motion of particles and rigid bodies. This includes studying linear and curvilinear motion, analyzing forces, and understanding energy transformations in dynamic systems. Key concepts include Newton's Laws of Motion, work-energy principles, impulse-momentum relationships, etc.

Learning Outcomes: By the end of this course, students will be able to:

1. Apply Newton's laws to solve problems involving motion with constant or variable acceleration.
2. Analyze simple harmonic motion and motion of particles connected by elastic strings.
3. Understand and calculate work, power, and potential energy, and evaluate work done in gravitational fields and conservative systems.
4. Analyze relative motion, including displacement, velocity, and acceleration in rotating reference frames.

Unit-I

Motion of a particle with constant acceleration, acceleration of falling bodies, motion under gravity, motion of a body projected vertically up wards: Newton's Laws of Motion, Motion of two particles connected by a string, motion along a smooth inclined plane.

Unit-II

Constrained motion along a smooth inclined plane. Variable acceleration: Simple harmonic motion, elastic string.

Unit-III

Curvilinear motion of a particle in a plane: Definition of velocity and acceleration, projectiles, motion in a circle. Work, power, conservative fields and the potential energy, work done against gravity, potential energy of a gravitational field.

*For students who have opted mathematics as a major subject in table-1.

Unit-IV

Relative motion, relative displacement, velocity and acceleration, motion relative to a rotating frame of reference. Linear momentum, angular momentum, conservation of angular momentum, impulsive forces, principle of impulse and momentum, motion with respect to centre of mass of a system of particles, collisions of elastic bodies, loss of energy during impact.

Objective: The objective of this course is to introduce some foundational concepts from group theory and ring theory which include definitions of groups, subgroups, cosets, homomorphisms, class equation, rings, integral domains, ideals, quotient rings, and polynomial rings etc. Some important theorems will also be introduced. The application of these topics in other fields of mathematics will also be discussed.

.

Learning Outcomes: By the end of this course, students will be able to:

1. Apply algebraic concepts in advanced mathematical contexts and related fields.
2. Analyze and construct homomorphisms and isomorphisms in group and ring theory,
3. Differentiate between rings, integral domains, and division rings, and work with ideals, quotient rings, and polynomial rings.

Unit-I

Groups, Elementary Properties of Groups, order of element of a group, cyclic group, Subgroups, Cosets and Lagrange's Theorem, Normal subgroups, Normalizer of of element in Group, Centre of group and Quotient Groups.

Unit-II

Group Homomorphism and Isomorphism, Theorems on Homomorphism, Permutation Groups, Caley's Theorem, cyclic Permutation, even and odd permutation, disjoint permutation, Alternating groups, Simplicity of An, $n \geq 5$ (without proof). Conjugate elements, conjugate class, Class equation of finite group and its applications. Similar permutation, relation between similar and conjugate permutation, number of conjugate class of Sn is partition of n

*For students who have opted mathematics as a major subject in table-1.

Unit-III

Rings, Integral domains, unit element, Division Ring, some general properties of Rings, Characteristic of a ring, idempotent and nilpotent elements. Subrings, properties of sub ring, Centre of a ring , Ideals, properties of Ideals, principal Ideals, Product of Ideals, Modular Law.

Unit-IV

Prime and Maximal Ideals, Quotient Rings, Ring Homomorphisms, Types of Ring Homomorphism , Theorems on Ring Homomorphism, Polynomial rings, Division algorithm in ring of polynomials, Roots of polynomials, remainder Theorem

Semester-V
Major 11: Indian Philosophy of Religion

Credit: 4

Max. Marks: 100
Theory: 90 Marks
Internal Assessment: 10 Marks
Time: 03 Hours

Course Objectives

• To introduce students to the foundational concepts of Indian philosophy of religion, especially the idea of dharma.
• To examine classical Indian conceptions of the divine, self, karma, and liberation across traditions.
• To develop comparative understanding of Hindu, Buddhist, Jain, and Sikh religious philosophies.
• To analyse major arguments concerning the existence of God and the problem of evil in Indian thought.
• To cultivate critical insight into sources of religious knowledge, ritual practices, and the role of the guru.

Learning Outcomes

After completing this course, students will be able to:
• Explain the concept of dharma and distinguish it from the notion of religion in the Indian context.
• Analyse Indian conceptions of the divine, including nirguna and saguna frameworks.
• Compare doctrines of the self, karma, rebirth, bondage, and liberation across major Indian traditions.
• Critically evaluate classical proofs for the existence of God and Indian responses to the problem of evil.
• Interpret the epistemic sources of religious knowledge and assess the role of ritual, bhakti, and the guru.

Pedagogy of Course

The pedagogy of this course integrates textual study of classical sources, conceptual lectures, and comparative discussions to develop a nuanced understanding of Indian philosophy of religion. Emphasis is placed on hermeneutic interpretation of key concepts across traditions. Classroom dialogue, student presentations, and reflective writing foster critical engagement. ICT-enabled resources support interdisciplinary and textual learning. • To analyse the ethical and socio-political thought of Gandhi and Ambedkar.
• To cultivate comparative and interpretive skills for engaging with contemporary Indian philosophical discourse.

Learning Outcomes

After completing this course, students will be able to:
• Explain the philosophical contributions of Vivekananda and Aurobindo to modern Indian thought.
• Analyse Iqbal's concept of self and Tagore's philosophy of religion and education.
• Critically interpret K. C. Bhattacharyya's notion of subject as freedom and Radhakrishnan's view of intuition.
• Evaluate J. Krishnamurti's analysis of self and freedom.
• Assess Gandhi's and Ambedkar's socio-political philosophies with conceptual clarity.

Pedagogy of Course

The pedagogy of this course integrates close textual reading, conceptual lectures, and comparative discussions to develop a nuanced understanding of modern Indian philosophy. Emphasis is placed on interpreting primary ideas of major thinkers through guided classroom dialogue and student presentations. Reflective writing, thematic seminars, and contextual analysis connect philosophical doctrines with contemporary concerns. ICT-enabled resources support interdisciplinary engagement. Continuous formative assessment through tutorials, presentations, and response papers ensures conceptual clarity, interpretive depth, and the development of independent philosophical reasoning.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:
The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25–30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks. For Private students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment. The Paper-Setter must put a note in question paper in this regard.

Semester-V
MAJ-A-13: Logic and Critical Thinking

Credit: 4 **Max. Marks: 100**
Theory: 90 Marks
Internal Assessment: 10 Marks
Time: 03 Hours

Course Objectives

• To introduce students to the foundations of logic, critical thinking, and epistemology.
• To develop analytical skills for identifying problems, arguments, and reasoning errors.
• To examine major epistemological distinctions concerning knowledge, belief, and justification.
• To familiarise students with deductive and inductive reasoning and common informal fallacies.
• To cultivate scientific and analogical reasoning within the framework of philosophical inquiry.

Learning Outcomes

After completing this course, students will be able to:
• Explain the nature of critical thinking and apply it to problem identification and analysis.
• Distinguish knowledge from belief and analyse different kinds and sources of knowledge.
• Recognize arguments, identify premises and conclusions, and evaluate their validity and soundness.
• Detect common informal fallacies in everyday and academic reasoning.
• Apply principles of scientific method, probability, and analogical reasoning in philosophical analysis.

Pedagogy of Course

The pedagogy of this course integrates conceptual lectures, guided analytical exercises, and problem-based learning to strengthen logical and critical reasoning skills. Emphasis is placed on hands-on practice in argument analysis, fallacy detection, and epistemic evaluation through classroom activities and worksheets. Interactive discussions, short writing tasks, and reasoning workshops foster active engagement. ICT-enabled tools and structured exercises support conceptual clarity. Continuous formative assessment through quizzes, tutorials, and analytical assignments ensures precision, clarity of thought, and the development of disciplined critical thinking among students.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:
The candidate shall attempt 5 questions in all (one compulsory and one each from four units). Semester VI
Table 1
Major 14: Twentieth Century Western Philosophy

Credit: 4

Max. Marks: 100
Theory: 90 Marks
Internal Assessment: 10 Marks
Time: 03 Hours

Course Objectives

• To introduce students to major movements and thinkers in contemporary Western philosophy.
• To examine key developments in idealism, phenomenology, analytic philosophy, and pragmatism.
• To develop critical understanding of language, logic, meaning, and reality in twentieth-century thought.
• To analyse existential and phenomenological approaches to being, consciousness, and world.
• To cultivate comparative and analytical skills for evaluating competing philosophical methodologies.

Learning Outcomes

After completing this course, students will be able to:
• Explain Hegel's dialectical idealism and Nietzsche's critique of Western culture.
• Analyse Russell's logical atomism and Wittgenstein's theories of language and meaning.
• Critically interpret Husserl's phenomenological method and Heidegger's concept of being-in-the-world.
• Evaluate the logical positivist programme and its critique of metaphysics.
• Assess pragmatic theories of meaning and Ryle's critique of Cartesian dualism.

Pedagogy of Course

The pedagogy of this course combines close textual engagement, conceptual lectures, and analytical discussions to develop advanced understanding of contemporary Western philosophy. Emphasis is placed on comparative study of major thinkers through guided reading and classroom dialogue. Student seminars, conceptual mapping, and short analytical writings strengthen interpretive and argumentative skills. ICT-enabled resources support conceptual visualisation of complex theories. Continuous formative assessment through tutorials, presentations, and response papers ensures conceptual clarity, analytical rigour, and the development of independent philosophical reasoning.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:
The candidate shall attempt 5 questions in all (one compulsory and one each from four units). Semester- VI
MAJ-A: 15 Applied Ethics

Credits: 4 **Max. Marks:** 100
Theory: 90 Marks
Internal Assessment: 10 Marks
Time: 3 Hours

Course Objectives

• To introduce students to the scope, methods, and key concepts of applied ethics.
• To examine major ethical issues in bioethics, environmental ethics, and technology ethics.
• To develop analytical skills for evaluating moral problems in contemporary contexts.
• To familiarise students with competing ethical approaches to technological and environmental challenges.
• To cultivate responsible ethical reasoning applicable to professional and public life.

Learning Outcomes

After completing this course, students will be able to:
• Explain the meaning, approaches, and methodological issues in applied ethics.
• Analyse key debates in bioethics including euthanasia, abortion, informed consent, and animal rights.
• Critically evaluate anthropocentric, biocentric, and ecocentric approaches in environmental ethics.
• Assess ethical challenges posed by information technology and technological innovation.
• Apply ethical frameworks to contemporary technological and environmental dilemmas.

Pedagogy of Course

The pedagogy of this course integrates conceptual lectures, case-based discussions, and applied ethical analysis to develop practical moral reasoning. Emphasis is placed on real-world case studies from medicine, environment, and technology. Classroom debates, student presentations, and problem-based learning foster critical engagement with contemporary ethical dilemmas. ICT-enabled resources support interdisciplinary understanding. Continuous formative assessment through case analyses, tutorials, and short reflective assignments ensures conceptual clarity, ethical sensitivity, and the development of responsible applied ethical judgement among students.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:

Semester VI
Major 16: Asian Philosophy

Credit: 4

Max. Marks: 100
Theory: 90 Marks
Internal Assessment: 10 Marks
Time: 03 Hours

Course Objectives

• To introduce students to major themes in comparative philosophy of religion across Asian traditions.
• To examine key metaphysical, ethical, and theological ideas in Zoroastrian, Judaic, Chinese, Japanese, and Islamic thought.
• To develop comparative understanding of concepts of God, world, soul, and ethics in different traditions.
• To analyse the philosophical foundations of Confucianism, Taoism, Shintoism, and Islam.
• To cultivate cross-cultural philosophical sensitivity and critical comparative skills.

Learning Outcomes

After completing this course, students will be able to:
• Explain central doctrines of Zoroastrianism and Judaism with reference to God, ethics, and eschatology.
• Analyse key concepts in Chinese philosophy including Confucian ethics and the Yin–Yang framework.
• Critically interpret Taoist metaphysics and Shinto philosophical themes.
• Evaluate the basic tenets of Islam and its philosophical understanding of God, world, and human life.
• Develop a comparative framework for understanding similarities and differences among major Asian religious philosophies.

Pedagogy of Course

The pedagogy of this course combines comparative lectures, textual interpretation, and thematic discussions to develop cross-cultural philosophical understanding. Emphasis is placed on close reading of doctrinal sources and analytical comparison across traditions. Classroom dialogue, student presentations, and reflective writing foster interpretive and comparative skills. ICT-enabled resources support global contextualisation. Continuous formative assessment through tutorials and response assignments ensures conceptual clarity, comparative insight, and the development of independent philosophical analysis of world religions.

Semester VI
Major 18: Philosophy of Mind

Credit: 4

Max. Marks: 100
Theory: 90 Marks
Internal Assessment: 10
Time: 03 Hours

Course Objectives

• To introduce students to the central problems and debates in Western philosophy of mind.
• To examine competing accounts of consciousness from first-person and third-person perspectives.
• To develop critical understanding of Cartesian dualism and its major critiques.
• To familiarise students with behaviourism, identity theory, functionalism, and representational theories of mind.
• To analyse contemporary positions such as interpretational theories and eliminativism.

Learning Outcomes

After completing this course, students will be able to:
• Explain the nature and scope of Western philosophy of mind and major theories of consciousness.
• Critically evaluate Cartesian dualism and its philosophical difficulties.
• Distinguish psychological and philosophical behaviourism and assess identity theory.
• Analyse functionalism and representational theories of mind with conceptual clarity.
• Evaluate interpretational approaches and eliminativism in contemporary philosophy of mind.

Pedagogy of Course

The pedagogy of this course integrates conceptual lectures, close reading of analytic texts, and structured classroom discussions to develop rigorous understanding of philosophy of mind. Emphasis is placed on argument analysis, conceptual clarification, and comparative evaluation of competing theories. Student seminars, short analytical writings, and problem-based exercises foster critical engagement. ICT-enabled resources support conceptual visualisation and interdisciplinary linkage with cognitive science. Continuous formative assessment through tutorials, presentations, and response papers ensures conceptual precision, analytical depth, and the development of independent philosophical reasoning.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:

The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25–30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks. For Private students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment. The Paper-Setter must put a note in question paper in this regard.

Course Content

Unit–I
Nature of Western Philosophy of Mind; Nature of Consciousness: First-Person Account and Third-Person Account.

Unit–II
Cartesian Dualism: Meaning, Problems, and Its Modifications.

Unit–III
Behaviourism: Meaning; Psychological Behaviourism of B. F. Skinner; Philosophical Behaviourism of L. Wittgenstein and G. Ryle; Identity Theory of J. J. C. Smart.

Unit–IV
Functionalism: A General Introduction; Representational Theory of Mind; Interpretational Theories of Mind (Donald Davidson and Daniel C. Dennett); Eliminativism (Paul Churchland).

Learning Outcomes

After completing this course, students will be able to:
• Explain the nature of philosophy and distinguish between metaphysical and epistemological inquiries.
• Analyse mechanical and dialectical materialism and evaluate objective and subjective idealism.
• Critically examine the nature of knowledge, the knower–known relation, and major theories of truth.
• Compare rationalist, empiricist, and Kantian theories of knowledge with conceptual clarity.
• Interpret philosophical accounts of substance, causality, and existential concepts of freedom and choice.

Pedagogy of Course

The pedagogy of this course integrates conceptual lectures, close textual reading, and analytical discussions to develop foundational philosophical understanding. Emphasis is placed on comparative study of major philosophical traditions through guided classroom dialogue and student presentations. Conceptual mapping, short analytical writings, and problem-based discussions strengthen interpretive skills. ICT-enabled resources support conceptual visualisation and textual engagement. Continuous formative assessment through tutorials, quizzes, and response papers ensures conceptual clarity, argumentative rigour, and the development of independent philosophical reasoning among students.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:

The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25–30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks. For Private students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately

be increased in lieu of the internal assessment. The Paper-Setter must put a note in question paper in this regard.

Total Credits: 4 (Theory: 3 lectures + Tutorial: 1 lecture)

Max. Marks : 100
Theory : 90 marks
Int. Ass. : 10 marks
Time : 3 Hours

Course Objective

The course has been designed to impart knowledge to the students on the law governing the 'prevention and detection of crime' i.e. Code of Criminal Procedure 1973, as without the adequate knowledge of this law, an academic course on police administration would be insufficient, incomplete and inadequate.

Learning Outcomes

This paper has been designed to impart knowledge to the students with respect to the different sections of Code of Criminal Procedure 1973 relating to trial of offences, arrest of persons, summons and warrants, maintenance of public order and tranquility, preventive actions of police, powers of police in investigation and initiations of criminal procedures. The knowledge of these sections would enable the students to understand the procedures involved in police functioning and inculcate critical thinking to apply the sections in real-life situations.

POL-DSC-11(MAJ)-503: Major or Discipline-Specific Core

International Organisations

Total Credits: 4 credits (Theory: 45 hrs. + Tutorial: 15 hrs.)

Max.Marks	:	100 marks
Theory	:	90 marks
Int. Ass.	:	10 marks
Time	:	3 hours

Course Objectives:

This course aims to provide students with a comprehensive understanding of the evolution, structure, and functioning of major international organizations and regional bodies. It enables learners to critically analyze the role of the United Nations and its specialized agencies, as well as the principles and challenges of global financial institutions such as the World Bank, the IMF. The course further examines regionalism and regional integration worldwide by studying select regional organizations. By engaging with historical contexts, institutional frameworks, and contemporary reforms, students develop the ability to assess the dynamics of global governance and regional integration**.**

Learning Outcomes:

By the end of this course, students will identify major international and regional organizations and their historical evolution. They will explain the core principles, structures and functions of these institutions. Students will apply analytical frameworks to understand how organizations address global and regional challenges. They will analyze patterns of cooperation, asymmetry and institutional reform. Learners will evaluate the effectiveness of international organizations in promoting governance and integration. Finally, they will formulate informed insights and recommendations to improve the functioning of global and regional institutions.

Pedagogy of the Course:

The course will be taught through a mix of interactive lectures using ICT, thematic discussions and case-based analysis of major international and regional organizations. Students will engage with official documents, data, and contemporary policy debates to deepen conceptual understanding. Group activities, short research tasks and simulations will encourage application of theory to real-world governance challenges. Critical reflection and comparative inquiry will be emphasized throughout.

Instructions for Paper-setter and candidates:

i. There shall be 9 questions in all. The first question shall be compulsory and be short answer type containing 12 short questions spread over the whole syllabus and to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions carrying 2 marks (9x2 = 18 marks). Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall have two questions and the candidates shall attempt one question from each unit i.e. four questions in all. Each question will carry 18 marks (4x18 = 72 marks).

ii. For private candidates who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.

The paper–setter must put note (ii) in the question paper.

Issues in Indian Politics

Total Credits: 4 credits (Theory: 45 hrs. + Tutorial: 15 hrs.)

Max.Marks	:	100 marks
Theory	:	90 marks
Int. Ass.	:	10 marks
Time	:	3 hours

Course objective

This course is in continuation with the earlier course which also takes up important themes and concepts related to Indian politics and economy, which has generated debates and discussions in the last few decades. Studying the course would enable the students to study the political, economic and social issues which are part of the ongoing debates and discussions in contemporary India. Students would come to be acquainted with different political perspectives and ideological positions that inform these discussions and debates. And, in the process, they would be able to make sense of the way democracy as an institution works on the ground in India.

Learning Outcomes

- Understanding of the major themes in contemporary Indian politics and economy.
- Understanding and contextualising the ongoing academic debates veering around the themes/issues which concern contemporary India's society, economy, and politics.

Pedagogy of the Course:

The students will be assessed on the basis of written examination comprising of 90 marks and continuous internal assessment of 10 marks on the basis of Unit test, Snap test, Attendance, Class assignments and class room participations.

Instructions for Paper-setter and candidates:

i. There shall be 9 questions in all. The first question shall be compulsory and be short answer type containing 12 short questions spread over the whole syllabus and to be answered in about 25 to 30 words. The candidate is required to attempt any 9 short answer type questions carrying 2 marks (9x2 = 18 marks). Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall have two questions and the candidates shall attempt one question from each unit i.e. four questions in all. Each question will carry 18 marks (4x18 = 72 marks).

ii. For private candidates who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
The paper–setter must put note (ii) in the question paper.

Development Administration
(Offered as Minor)

Max. Marks	**: 100**
Theory	**: 90 Marks**
Internal Assessment	**: 10 Marks**
Time	**: 03 Hours**

Course Objective

The objective of this paper is to familiarize students with the concept, evolution, and significance of development administration and its role in achieving sustainable development. It explores the machinery for planning, public enterprise reforms, and the role of various stakeholders, including bureaucracy, civil society, and the voluntary sector, with a special emphasis on gender and people's participation in development.

Learning outcomes

1. Understand what development administration means, why it is important, and how it has changed over time. Build critical ability by comparing the features of developed and developing countries.
2. Learn how government planning works at the central, state, and district levels. Improve decision-making skills by studying the role of NITI Aayog and how the United Nations supports global goals like the Sustainable Development Goals.
3. Know how public sector companies are formed and managed in India. Use creativity to explore different ways they are being improved through reforms.
4. Analyze how government officers, social groups, and voluntary organizations help in development. Understand how gender equality and people's involvement make development more effective.

Pedagogy of the Course

The students will be assessed on the basis of written examination comprising of 90 marks and continuous internal assessment of 10 marks, based on class test, academic activities, Attendance, Class assignments and class room participation.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.
- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Public Policy and Governance

Max. Marks	**: 100**
Theory	**: 90 Marks**
Internal Assessment	**: 10 Marks**
Time	**: 03 Hours**

Course Objective

The objective of this paper is to provide students with an in-depth understanding of public policy, its formulation, implementation, and evaluation. It covers key models, processes, and actors involved in policymaking while examining the role of institutions, interest groups, and societal values in shaping and assessing policies.

Learning outcomes

1. Understand what public policy is, why it matters, and the different types and models used to study it. Build critical ability by comparing ideas like systems theory and group dynamics in policymaking.
2. Learn how policies are made by different institutions like the legislature, executive, and judiciary. Improve decision-making by exploring how media, public values, and interest groups shape policies.
3. Know how public policies are carried out and what factors help or block their implementation. Use creativity to understand how civil services, civil society, and businesses play their roles.
4. Learn how to check whether a policy is working well or not. Gain critical thinking by studying who evaluates policies and what challenges they face in doing so.

Pedagogy of the Course

The students will be assessed on the basis of written examination comprising of 90 marks and continuous internal assessment of 10 marks, based on class test, academic activities, Attendance, Class assignments and class room participation.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.
- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Techniques of Administrative Improvement

Max. Marks	**: 100**
Theory	**: 90 Marks**
Internal Assessment	**: 10 Marks**
Time	**: 03 Hours**

Course Objective

The objective of this course is to provide students with a comprehensive understanding of administrative improvement and its significance in enhancing administrative efficiency. The course explores methods for managing change at both the operational and policy planning levels, focusing on the reports of Government of India Commissions on Administrative Improvement and Reforms. It also examines the functioning of the O&M Division of the Government of India, bridging the gap between theoretical concepts and practical implementation of administrative reforms in public administration.

Learning outcomes

1. Understand the concept and importance of administrative improvement in boosting efficiency. Build critical thinking by exploring its role in enhancing public administration.
2. Learn strategies for managing organizational change at both operational and policy levels. Develop decision-making skills by analyzing how these changes impact administrative systems.
3. Examine the reports of Government of India Commissions on administrative reforms. Improve creativity by understanding how these reforms shape public administration.
4. Explore the role of the O&M Division in promoting administrative improvements. Link theoretical knowledge with practical applications in improving public sector management.

Pedagogy of the Course

The students will be assessed on the basis of written examination comprising of 90 marks and continuous internal assessment of 10 marks, based on class test, academic activities, Attendance, Class assignments and class room participation.

NEP 2020 COLLEGES ARTS TEMPLATE: STUDENTS OPTING FOR SINGLE MAJOR, SINGLE/DOUBLE MINER IN BA, BA HONOURS AND BA HONOURS WITH RESEARCH

(Syllabus Semester I - VI)

SANSKRIT

Learning Objectives of the Programme

1. From the Vedic to Classical Sanskrit, an enormous corpus of texts has been composed, which act as a record of one of the longest surviving human civilisations in the world. Thus a student of Sanskrit language can take a look at ideas, systems, techniques and so forth, spanning across many millennia.
2. Despite being an ancient language, Sanskrit has not stopped adapting to the contemporary needs. New experiments are being done on various dimensions of Sanskrit, making it a very dynamic language of today's world.
3. With the recent emphasis on Indian Knowledge Systems (IKS), the study of Sanskrit is gaining more importance today. This not only is making way for renewed interest in Sanskrit learning, but is also opening up new employment and entrepreneurial opportunities in Sanskrit.
4. Sanskrit is a subject of global interest and research, where various dimensions of Sanskrit, such as social, literary, philosophical, scientific and so forth, are being studied. This calls for a more robust and dynamic participation of Indian Sanskrit scholars, hence providing them a global stage.
5. Studying Sanskrit provides an opportunity of overall development of a student. From aesthetics, poetics, philosophy to formal logic and so forth, a student of Sanskrit gets to look at the world in various ways, thinks critically and analyses keenly working towards providing solutions for contemporary problems.

NON-PARAMETRIC STATISTICAL INFERENCE

Learning Objectives: The learning objectives include:

1. Understand the Foundations of Nonparametric Methods.
2. Apply Nonparametric Tests to One-Sample, Two-Sample, and Paired-Sample Problems.
3. Analyze Location and Scale Differences Using Linear Rank Tests and ANOVA Alternatives.
4. Evaluate Measures of Association in Bivariate and Multivariate Contexts.

Learning Outcomes: After completing this course, students should have developed a clear understanding of:

1. Distinguish between Parametric and Nonparametric test and appreciate different measurementscales

2. Understands quantile and empirical distribution function and its utility
3. Use nonparametric test for both one/two samples problem, Test for randomness, Kolmogorov-Smirnov one sample and two sample tests, sign test, Wilcoxon signed rank test, run test. Mediantest, Mann Whitney U test, Kruskal-Wallis one-way analysis of variance by ranks.
4. Test association of bivariate samples using Kendall tau and Spearman's rank correlation.

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 8 short answer type questions. Rest of the eight questions will be set from the four units uniformly i.e. two from each unit. The candidate will be required to attempt five questions in all selecting one question from each unit and the compulsory one. All the questions will carry equal marks.

UNIT I

Nonparametric Tests:Introduction and Concept, Non-parametric tests-their advantages and disadvantages, comparison withparametric tests. Measurement scale-nominal, ordinal, interval and ratio. The quantile function, theempirical distribution function, Test for randomness based on total number of runs.

UNIT II

One-Sample, two-sample problem, and Paired-Sample Procedures: the sign test, treatment of ties in ranktests, Wilcoxon signed-rank test, Wald-Wolfowitz runs test, Kolmogorov-Smirnov one and two-sampletest, median test, and the Mann-Whitney U test.

UNIT III

Linear Rank Tests for the Location and Scale Problem:Definition of linear rank statistics, Wilcoxon rank-sum test; Tests of the Equality of k IndependentSamples: The Kruskal-Wallis one-way ANOVA test; Measures of Association for Bivariate Samples:definition of measures of association in a bivariate population, Kendall's Tau coefficient, Spearman'scoefficient of rank correlation.

UNIT IV

Measures of association in multiple classifications: Friedman's two-way ANOVA by ranks in a k x ntable, the Coefficient of Concordance of k sets of rankings of n objects, the Coefficient ofConcordance of k sets of incomplete rankings

MATRICES

Course Objectives:

1. To develop a foundational understanding of the theory of equations.
2. To introduce the fundamental concepts of linear algebra.
3. To review and expand knowledge of matrix algebra and determinants.
4. To explore advanced topics in linear algebra**, including matrix rank, generalized inverses, characteristic roots and vectors, the Cayley-Hamilton theorem, and diagonalization of quadratic forms through orthogonal transformations.

Course Learning Outcomes:

After completing this course, students should have developed a clear understanding of:

1. Apply the Fundamental Theorem of Algebra and Root-Coefficient Relationships.
2. Demonstrate Proficiency in Vector Space Concepts.
3. Utilize Matrix Algebra and Determinants in Solving Linear Systems.
4. Determine Matrix Rank and Analyze Eigenvalues, Eigenvectors, and Quadratic Forms.

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 8 short answer type questions. Rest of the eight questions will be set from the four units uniformly i.e. two from each unit. The candidate will be required to attempt five questions in all selecting one question from each unit and the compulsory one. All the questions will carry equal marks.

UNIT I

Algebra of matrices - A review, theorems related to triangular, symmetric and skew symmetric matrices, idempotent matrices, Hermitian and skew Hermitian matrices, orthogonal matrices,

singular and non-singular matrices and their properties. Trace of a matrix, unitary, involutory and nilpotent matrices. Adjoint and inverse of a matrix and related properties.

UNIT II

Determinants of Matrices: Definition, properties and applications of determinants for 3rd and higher orders, evaluation of determinants of order 3 and more using transformations. Symmetric and Skew symmetric determinants, Circulant determinants, Jacobi's Theorem, product of determinants. Use of determinants in solution to the system of linear equations, row reduction and echelon forms, the matrix equations AX=B, solution sets of linear equations, linear independence, Applications of linear equations, inverse of a matrix.

UNITIII

Theory of equations, statement of the fundamental theorem of algebra and its consequences.Relation between roots and coefficients or any polynomial equations.Solutions of cubic and biquadratic equations when some conditions on roots of equations are given.Evaluation of the symmetric polynomials and roots of cubic and biquadratic equations. Vector spaces, Subspaces, sum of subspaces, Span of a set, Linear dependence and independence, dimension and basis, dimension theorem.

UNIT IV

Rank of a matrix, row-rank, column-rank, standard theorems on ranks, rank of the sum and the product of two matrices. Generalized inverse (concept with illustrations).Partitioning of matrices and simple properties. Characteristic roots and Characteristic vector, Properties of characteristic roots, Cayley Hamilton theorem, Quadratic forms, Linear orthogonal transformation and their digitalization.

APPLIED STATISTICS-II

Objectives: The learning objectives include:

1. To familiarize students with the Indian statistical system and the role of official statistical agencies at central and state levels.
2. To understand the collection, classification, and interpretation of official statistics in sectors like population, agriculture, industry, trade, labor, transport, and finance.
3. To develop knowledge of Statistical Quality Control (SQC) methods, including control charts for variables and attributes, and their industrial applications.
4. To provide insights into acceptance sampling techniques, their plans, operating characteristics, and associated risks in quality inspection.

Learning Outcomes: After completing this course, students will be able to:

1. Explain the structure and functions of the Indian statistical system and interpret official statistics related to population, agriculture, industry, trade, labor, transport, and finance.
2. Apply Statistical Quality Control (SQC) techniques to analyze process variations and construct control charts for variables and attributes.
3. Interpret control charts (R, σ, p, d, c charts) for monitoring and improving product and process quality.
4. Design and evaluate acceptance sampling plans, understanding concepts such as AQL, LTPD, producer's risk, and consumer's risk.

UNIT-I

Indian official statistics: Introduction, Indian statistical system, Statistical offices at the centre, Statistical offices in the states, Population statistics, Agricultural statistics, Industrial statistics, Trade statistics, Price statistics, Statistics of labor and employment, Statistics of transport and communication, Financial and banking statistics.

UNIT-II

Statistical Quality Control: Meaning and uses of Statistical Quality Control (SQC), causes of variations in quality, product and process control, control charts, 3-σ control limits, control chart for variables- $\bar{X}$ and R chart, Interpretation of $\bar{X}$& R charts.

UNIT-III

Control chart for standard deviation (σ chart), control charts for attributes: control charts for number of defectives (d-chart), control charts for fraction defectives (p-chart) and control charts for number of defects per UNIT (c-chart), applications of c-chart, natural tolerance and specification limits.

UNIT-IV

Acceptance sampling :Acceptance sampling inspection plans, Acceptance quality level (AQL), lot tolerance proportion defective (LTPD), process average fraction defective, producer's and consumer's risks, rectifying inspection plans, single and double sampling plans, their OC functions, concepts of AQL, LTPD, AOQL, average amount of inspection and ASN function.

BASIC STATISTICS USING R PROGRAMMING

Course Objectives:
The main objectives of this course are:

1. To Impart training in R programming, create different types of R objects and perform operations
2. To detail the construction of plots, various discrete and continuous probability distributions
3. To impart skills in analyzing univariate and bivariate data.

Course Outcomes:
On the successful completion of the course, student will be able:

1. To Impart training in R programming.
2. To create different types of R objects and perform operations, construction of plots.
3. To work on various discrete and continuous probability distributions.

UNIT-I

Introduction to R: Features, installation, variable, input of data, output, in-built functions, packages. Data types in R: vectors, matrices, array, lists, factors, data frame. Programming in R: decision making structures (if structure, switch statement), loops (For, While, Repeat). Import and export of data.

UNIT-II

Data Visualization and Descriptive Statistics: generating tables - Bar plots - Pie chart - Box plot – Histogram, frequency polygon, cumulative frequency curves or Ogives, stem and leaf chart, Scatter plot – line plots (single, multiple) – partitioning graphics window – adding title, labels and legends to plots - obtaining measures of central tendency, measures of dispersion, Skewness and kurtosis.

UNIT-III

Probability Distributions: Obtaining density, cumulative density and quantile values for discrete and continuous distributions: Binomial, Poisson, Exponential, and Normal, generating samples from discrete and continuous distributions - Plotting density and cumulative density curves - Q-Q plot.

UNIT-IV

Analyzing bivariate and multivariate data: Correlation analysis - Pearson, Spearman, multiple and partial correlations.

Regression Analysis: Fitting of linear, quadratic, exponential functions curves and multiple regressions with the interpretation of results.

OPTIMIZATION TECHNIQUES

Objectives: The learning objectives of this course are as follows:

1. To develop the ability to formulate and solve Linear Programming Problems (LPP) using graphical and simplex-based methods, including duality concepts.
2. To equip students with techniques for solving transportation, assignment, and game theory problems for optimal decision-making in resource allocation and competitive situations.
3. To enable students to apply network analysis methods (CPM & PERT) for effective project planning, scheduling, and control.

Learning Outcomes: After successful completion of this course, students should be able to:

1. Formulate and solve Linear Programming Problems (LPP)** using graphical, simplex, Big-M, and Two-Phase methods, and apply the concept of duality.

2. Analyze and solve transportation and assignment problems** using standard methods such as NWC, LCM, VAM, MODI, and Hungarian method.
3. Apply game theory techniques (pure and mixed strategies, dominance rule, and graphical methods) to find optimal strategies in two-person zero-sum games.
4. Construct and analyze project networks using CPM and PERT, determining critical path, slack, float, and project scheduling parameters (EST, EFT, LST, LFT).

LINEAR MODELS

Course Objectives:

The learning objectives include developing a clear understanding of the fundamental concepts of linear models and a range of associated skills allowing the students to work effectively with them.

Learning Outcomes: After completing this course, students should have developed a clear understanding of:

1. Theory and estimation of Linear Models.
2. Gauss-Markov Theorem and its use.
3. Distribution of quadratic forms.
4. Simple and Multiple linear regression models and their applications.
5. Fitting of these models to real or synthetic data, derivation of confidence and prediction intervals, and a sound scientific interpretation of the results.
6. Techniques of Analysis of Variance and Covariance under fixed effects model.
7. Assessment of the quality of the fit using classical diagnostics, awareness of potential problems (outliers, etc.) and application of remedies to deal with them. Contents:

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 8 short answer type questions. Rest of the eight questions will be set from the four units uniformly i.e. two from each unit. UNIT I

Gauss-Markov set up: Theory of linear estimation, Estimability of linear parametric functions, Method of least squares, Gauss-Markov theorem, Estimation of error variance. Distribution of quadratic forms.

UNIT II

Regression analysis: Simple Regression analysis, Estimation and hypothesis testing in case of simple and multiple regression analysis, Confidence intervals and Prediction intervals, Concept of model matrix and its use in estimation. Effect of orthogonal columns in the X matrix, Partial F-test and Sequential F-test, Bias in regression estimates.

UNIT III

Analysis of Variance and Covariance: Definition of fixed, random and mixed effect models, analysis of variance and covariance in one-way classified data for fixed effect models, analysis of variance in two-way classified data with equal number of observations per cell for fixed effect models.

UNIT IV

Model checking: Prediction from a fitted model, Residuals and Outliers, Lack of fit and pure error, Violation of usual assumptions concerning normality, Homoscedasticity and collinearity, Diagnostics using quantile-quantile plots. Model Building: Techniques for Variable selection. Polynomial Regression models: Orthogonal Polynomials.

DEMOGRAPHY

Objectives: The learning objectives of this course are as follows:

1. To collect valid Demographic data using different methods.
2. To learn basic measures of Mortality, Fertility, Population Growth and life tables.
3. To learn about measures of marriages and migration.

Learning Outcomes: After successful completion of this course, students should be able to:

1. Understand vital statistics and its sources.
2. Understand the basic measures of Mortality.
3. Understand the concept of Life Tables and their construction.
4. Understand the basic measures of Fertility and population growth.
5. Apply measures of marriages and migration.

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 8 short answer type questions. Rest of the eight questions will be set from the four units uniformly i.e. two from each unit. The candidate will be required to attempt five questions

in all selecting one question from each unit and the compulsory one. All the questions will carry equal marks.

UNIT I

Introduction to Vital Statistics: Definition sources of collecting data on vital statistics, errors in the census, and registration data. Measurement of population, rate, and the ratio of vital events. Measurements of Mortality: Crude Death Rate (CDR), Specific Death Rate (SDR), Standardized Death Rates (STDR) and Infant Mortality Rate (IMR).

UNIT II

Life(Mortality) Tables: Assumption, description, construction of Life Tables, and Uses of Life, Expectation of life, Central Mortality Rates, and Force of Mortality. Abridged life table: Definition, methods of construction of abridged life table: Reed-Merrell Method and Greville's Method.

UNIT III

Measurements of Fertility: Crude Birth Rate (CBR), General Fertility Rate (GFR), Specific Fertility Rate (SFR), and TotalFertility Rate (TFR). Measurement of Population Growth: Crude rates of natural increase, Pearl's Vital Index, Gross Reproduction Rate (GRR), and Net Reproduction Rate (NRR).

UNIT IV

Introduction, Sources and Quality of Nuptiality Data, General, Specific, Total and Standardized Marriage rates, Mean Age at Marriage, Measures of Migration: Concept of mobility and migration, sources of data, types of migration, Internal & international migrations; measures of internal migration.

(ii) The practical of paper (STAT-DSC-16Maj-603) will be based on the following topics:

1. To calculate CDR and Age Specific death rate for a given set of data.
2. To find a standardized death rate by (i) Direct method and (ii) Indirect method.
3. To construct a complete life table.
4. To fill in the missing entries in a life table.
5. To calculate CBR, GFR, SFR, TFR for a given set of data.
6. To calculate Crude rate of Natural Increase and Pearle's Vital Index for a given set of data.
7. Calculate GRR and NRR for a given set of data and compare them.

ADVANCED STATISTICS USING R PROGRAMMING

Course Objectives: The main objective of this course is to allow the students to learn the advanced techniques of modelling real data from diverse discipline using R Programming. Also, they can utilize Nonparametric/distribution free tests and its role for different type of data.Students learn and apply different types of parametric and non-parametric test in real life using R.

Learning Outcomes: After completing this course, students should have developed a clear understanding of:

1. Distinguish between Parametric and Nonparametric test and appreciate different measurement scales.
2. Use nonparametric test for one/two and more than two samples problem using R.
3. Understand and apply different types of regression model using R Programming.

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 8 short answer type questions. Rest of the eight questions will be set from the four units uniformly

UNIT-I

Sampling distributions: Chi Square, t and F distribution, Hypothesis testing of mean and variance: one-sample and two-sample t, F and chi-square test, Levene test. Testing of proportion for one-sample and two sample problem.

UNIT-II

Linear Models: Fixed, random and mixed effects models, ANOVA: one-way and two-ways, ANOCOVA. Regression Models: Simple and Multiple Linear Regression, Forward, Backward and stepwise regression, Residual analysis. Diagnostics and tests for violations of model assumptions: Multicollinearity, Autocorrelation and Homoscedasticity.

UNIT-III

Nonparametric Tests: One-Sample, two-sample problem, and Paired-Sample Procedures: the sign test, treatment of ties in rank tests, Wilcoxon signed-rank test, Wald-Wolfowitz runs test, Kolmogorov-Smirnov one and two-sample test, median test, and the Mann-Whitney U test.

UNIT-IV

Nonparametric Tests (Continued): Tests for equality of k independent samples: Kruskal-Wallis one way ANOVA test, Measures of Association for bivariate samples: Kendall's Tau coefficient. Measures of association in multiple classifications: Friedman's two-way ANOVA by ranks in a k x n table, the Coefficient of Concordance of k sets of rankings of n objects.

NUMERICAL ANALYSIS

Course Objectives: To comprehend various computational techniques to find approximate value for possible root(s) of non-algebraic equations, to find the approximate solutions of system of linear equations and ordinary differential equations.

Course Learning Outcomes: The course will enable the students to learn the following:

1. Some numerical methods to find the zeroes of nonlinear functions of a single variable and solution of a system of linear equations, up to a certain given level of precision.
2. Interpolation techniques to compute the values for a tabulated function at points not in the table.
3. Applications of numerical differentiation and integration to convert differential equations into difference equations for numerical solutions.

SAMPLING DISTRIBUTIONS

Objectives: The learning objectives of this course are as follows:

1. To introduce the modes of convergence and their relation to limit laws, with a focus on the central limit theorem.
2. To introduce the concept of sampling distributions and their applications in statistical inference.
3. To describe the statistical ideas behind the procedure of hypothesis testing.
4. To explain the assumptions and conditions under which to apply different tests of hypothesis about population parameters and draw appropriate conclusions from the analysis.

Learning Outcomes: After successful completion of this course, students should be able to:

1. Understand the basics of convergence theory and its importance in limit laws.
2. Apply the concept of the central limit theorem and the relevance of the theorem in
3. inferential statistics.
4. Analyze data by using suitable hypothesis testing procedures in real-life applications related to large and small samples.
5. Apply the knowledge of the idea of sampling distributions and appreciate their importance
6. in the field of statistics.
7. Integrate the knowledge of various sampling distributions like chi-square, t, and F distributions in hypothesis testing problems.

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 8 short answer type questions. Rest of the eight questions will be set from the four units uniformly i.e. two from each unit. UNIT I

Generating functions and Central Limit Theorem: Moment generating function, its limitations, properties, cumulants and their properties, characteristic function and its properties,Chebyshev's inequality, Weak Law of Large Numbers (WLLN),along with examples and applications.

Basic idea and relevance of Central Limit Theorem (CLT), De-Moivre Laplace theorem,Lindeberg Levy theorem, Liapunov Theorem (only statement), and applications of CLT.

UNIT II

Sampling Distributions and Test of Hypotheses: Concepts of parameter, statistic, sampling distribution of a statistic, standard error. Samplingdistribution of sample mean, standard errors of the sample mean, sample variance, and sampleproportion.

Null and alternative hypotheses, level of significance, Type I and Type II errors, theirprobabilities and critical region, determination of sample size, confidence intervals, and pvalue.

Tests of significance and confidence intervals for - single proportion, difference of twoproportions, single mean, difference of two means, and difference of two standard deviations.

UNIT III

Exact Sampling Distribution: Chi-Square distribution: Definition and derivation of the probability distribution of Chi-squaredistribution with n degrees of freedom, nature of the curve for different degrees of freedom,mean, mode, variance, moment generating function, cumulantgenerating function, additiveproperty, and limiting form of the Chi-square distribution, Applications of Chi-Squaredistribution.

UNIT IV

Exact Sampling Distributions (continued): Student's t-statistic and Fishers t-statistic: definition and derivation of their samplingdistributions, nature and characteristics of graph of t distribution, moments, limiting form andapplications of the t distribution.

F-statistic: Definition and derivation of the sampling distribution, the graph of F distribution,moments, and applications of the F distribution. Relationship between t, F, and Chi-squaredistributions.

Objectives: The learning objectives include:

1. To familiarize students with the Indian statistical system and the role of official statistical agencies at central and state levels.
2. To understand the collection, classification, and interpretation of official statistics in sectors like population, agriculture, industry, trade, labor, transport, and finance.
3. To develop knowledge of Statistical Quality Control (SQC) methods, including control charts for variables and attributes, and their industrial applications.
4. To provide insights into acceptance sampling techniques, their plans, operating characteristics, and associated risks in quality inspection.

Learning Outcomes: After completing this course, students will be able to:

1. Explain the structure and functions of the Indian statistical system and interpret official statistics related to population, agriculture, industry, trade, labor, transport, and finance.
2. Apply Statistical Quality Control (SQC) techniques to analyze process variations and construct control charts for variables and attributes.
3. Interpret control charts (R, σ, p, d, c charts) for monitoring and improving product and process quality.

Notes:

1. In the first semester student is offered three different subjects A, B & C.
2. At the end of the second semester, each student has the option to choose any one of the two streams, namely Single Major or Multi-Disciplinary. The student choosing the Single Major stream is required to give his/her Major and Minor at the end of the second semester.
3. The student who chooses a multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in the Minor subject.
4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 - YEAR DEGREE B.A. HONOURS with research, on the condition that the Institution is a PU-approved Research Centre or offering or already offering Master programme in the subject.
5. The student opting for a Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for a Minor in a particular subject, the student must attain at least 12 credits in that subject(s).
6. The student exiting the programme after one year, securing 48 credits, will be awarded a UG Certificate provided he/she secure 4 credits from summer internship/community work. Further, the student exiting the programme after two years, securing 96 credits, will be awarded a UG Diploma provided he/she secure 4 credits from a summer internship. The student who successfully secures 144 credits will be awarded a BA degree.
7. The language papers chosen as MIL-1 and MIL-2 should be on the same subject.
8. Once Major and Minor papers are chosen in the 3rd semester, the same will continue as Major and Minor subjects in the subsequent semesters.
9. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write a Dissertation of 08 credits in one of the two Major subjects.

Course Objective

The objective of the course is to sensitize the students regarding the basic concepts and approaches used for explaining gender. The purpose of the paper is to equip students of sociology to understand gender in all dimensions and not merely as women's issues. Note the difference in gender roles, responsibilities, rights and relations. The student will be able to explore gender dynamics, trace out the growth of feminism and analyse how gender shapes experiences and contributes to social patterns. Additionally, studying this Paper may foster critical thinking about gender related issues, promote awareness of inequalities, and encourage discussions on creating more inclusive and equitable societies. Finally, it exposes the student to specific problems and legal provisions made available to counter these problems relating to gender inequality in the Indian context.

Learning Outcomes

1. Learners will be able to define the concept of gender and identify various gender identities beyond the traditional male-female binary, appreciating gender as a social and cultural construct.
2. Learners will be able to distinguish between the terms 'sex' and 'gender', understanding their biological and sociological dimensions and their relevance in addressing gender inequalities.
3. Learners will gain knowledge of different theoretical approaches to understand gender.
4. Learners will comprehend the importance of women empowerment for achieving social justice and development, and will be able to explain key strategies for promoting women's rights and participation in various spheres of life.
